ABSTRACT

*Survey of Income and Program Participation (SIPP) 1991 Full Panel Microdata Tape
and CD-ROM File [machine readable data file] / conducted by the U.S. Bureau of
the Census. –Washington: The Bureau [producer and distributor], 1995.*

Type of File

Microdata; unit of observation is an individual.

Universe Description

The universe is the resident population of the United States, excluding persons living in institutions and military barracks.

Subject-Matter Description

The file contains basic demographic, social, and economic characteristics data for each member of the household during the 1991 Panel of the Survey of Income and Program Participation (SIPP). These include age, sex, race (White; Black; American Indian, Eskimo, and Aleut; Asian or Pacific Islander; and Other), ethnic origin (23 categories including 7 Spanish origin categories), marital status, household relationship, education, and veteran status. Limited data are provided on housing unit characteristics such as units in structure and tenure. Core questions, which are repeated at each interview, cover monthly labor force activity, types and amounts of monthly income, and participation in various cash and noncash benefit programs for each month of the survey period. Data for employed persons include number of hours and weeks worked, earnings, and weeks without a job. Nonworkers are classified as unemployed or not in the labor force. In addition to income data associated with labor force activity, data include nearly 50 other types of income.

The file provides a set of monthly observations covering eight waves of the 1991 Panel. The time span covered by the file varies depending on the rotation group to which the respondent belongs. Since the sample was divided into four approximately equal groups or rotations and one group (having a reference period of the four previous months) was interviewed each month, the panel contains four different time spans. They are January 1991 to May 1993, October 1990 to June 1993, November 1990 to July 1993, and December 1990 to August 1993 (see Table 1 on page 1-3).

This documentation presents information designed to provide the basis for longitudinal household analyses using SIPP data. It contains a discussion of the five variables which can be used to identify longitudinal households, and persons in longitudinal households. These variables are explained in more detail in the data dictionary under longitudinal household files.

Geographic Coverage

United States. Codes are included for 41 individual States, although the sample was not designed to produce State estimates. Areas in the SIPP sample in nine other States are identified in groups for confidentiality reasons.

Technical Description

File Structure: This is a rectangular (flat) file with one record for each person who, at anytime during the life of the 1991 Panel (February 1991 to September 1993), was a member of an interviewed household.

File Size: The file contains 44,373 records. Each record contains 12,568 characters.

File Sort Sequence: The file is in sort by the variables SU-ID, PP-ENTRY, and PP-PNUM.

Reference Materials

Interviewers' Manual (1985). Survey of Income and Program Participation. U.S. Department of Commerce, Bureau of the Census. The Manual is available from Customer Services, Bureau of the Census, Washington, D.C. 20233.

Survey of Income and Program Participation (SIPP) 1991 Full Panel Microdata Tape and CD-ROM File Technical Documentation. The documentation includes this abstract, the data dictionary, an index to the data dictionary, and general information on SIPP. One copy of the technical documentation accompanies each file order but also may be purchased separately from Customer Services, Bureau of the Census, Washington, D.C. 20233.

Survey of Income and Program Participation Users' Guide. The Users' Guide contains a general overview as well as chapters on survey design and content, structure and use of cross-sectional files, linking waves and reliability of the data. A single copy accompanies each technical documentation or tape order. Additional copies are available from Customer Services, Bureau of the Census, Washington, D.C. 20233.

The following order form can be used to purchase any of these materials.

Related Printed Reports

Related printed reports include working papers, compilations of papers presented at annual meetings of the American Statistical Association, articles appearing in the *Journal of Economic and Social Measurement,* and reports in the P-70 series of the Current Population Reports. See Appendix C of the Users' Guide that accompanies the documentation for ordering information on all related printed reports. Appendix C of this documentation contains ordering information for SIPP working papers.

Related Machine-Readable Data Files

SIPP files from all Waves of the 1984 through 1991 Panels as well as Waves 1 through 7 of the 1992 Panel and 1993 Panel Waves 1-3 are available from Customer Services, Data User Services Division, Bureau of the Census, Washington, DC 20233. An order form follows the next page for your convenience.

File Availability

Survey of Income and Program Participation (SIPP) 1991 Full Panel Microdata File is available on computer tape at 6250 bpi, ASCII or EBCDIC, and standard ANSI labeling and on CD-ROM. A machine-readable dictionary is contained at the end of each file. This dictionary is also available separately on one tape reel or cartridge. When ordering, please use the order form following the next page.

Table 1. Reference Months for Each Interview Month - 1991 File

Month of Interview	Wave	Rotation Group	(1990)	Reference Month (1991)	(1992)	(1993)
February 1991	1	2	Oct, Nov, Dec, Jan			
March	1	3	Nov, Dec, Jan, Feb			
April	1	4	Dec, Jan, Feb, Mar

September	8	1				May, Jun, Jul Aug

FILE INFORMATION

Introduction

The use of the SIPP public use data over the past four years has taught us a number of lessons. Foremost in those lessons is that the relational file structure is too complex for nearly all users. A close second is that the rectangular file, developed to simplify the relational file, is still too complicated for most users. We have also learned a number of ways to aid users in getting through the complexity of the rectangular file and have distributed those wherever possible. But the root of this lesson is that a public use file that is simpler than the current rectangular file is needed.

This solution does not provide a simpler file structure. In fact the person-month file structure is more complex than the rectangular person level file. What this solution provides is simplification and consistency to the content of the SIPP files. That simplification is achieved by coding everything to the monthly level.

The most confusing aspect of the SIPP data for most users is time. Data in SIPP are collected for particular weeks, all weeks, months, two or more months, and all months in the reference period. Disaggregating data collected for several months and aggregating data collected below the monthly level provide a variety of sources of confusion and error. The person-month structure puts all data at the month level with the appropriate aggregation or disaggregation.

The person-month structure is a natural unit because the basic building block of SIPP data is the month. All income, with the exception of a few asset income amounts, are collected at the monthly level and all household and family relationships are defined on a month-by-month basis. In collecting the data we have chosen to identify all changes except labor force changes as occurring between months. Data on labor force participation is given at both the weekly and monthly level. Changes in age and marital status occur from month-to-month. Income is recorded and recoded in monthly amounts. Data on participation in means-tested transfer programs is recorded on a monthly basis. You are considered a participant for a month, not on a week-by-week basis.

When analysts look at the SIPP data they see a large array of monthly and non-monthly data. Their problem then is to disaggregate the non-monthly data down to the month. In some cases this has been done for them. Households and families and their characteristics are defined on a monthly basis. But for most analysis there is considerable information that is carried only once per interview, or once for every four months, that must be disaggregated to the months. The person-month structure solves this problem by carrying all data at the monthly level. This requires a simple and straight forward assumption that the non-monthly data collected in the interview is the best proxy for the months covered by that interview.

A second source of confusion in the SIPP data is the volume of data combined with the presence of duplicated data. When the SIPP data were first released the Census Bureau chose to include all data, both collected and recoded, on the public use files. For those with experience with the survey, this was a valuable service. Edit routines could be checked by comparing the edited and unedited variables. Recodes could be checked by looking at the source codes used to develop these recodes. Universes could be determined by following through the skip patterns in the survey.

For most users this abundance of data results in confusion. It is difficult to understand why there are eight variables labeled sex in the file or why there are several variables that identify whether or not the person is a parent or guardian. Most users are expecting only one variable for each concept, not two or more.

Goals of the Redesign

This redesign effort is aimed at solving the problems of time and duplication on the SIPP public use data files. Time is simplified by carrying all variables on the monthly records. Data duplication is simplified by eliminating most if not all of the variables carried more than once per month. The third goal of this redesign is to reduce the total number of variables necessary and to impose a simple logical structure to the record layout. This paper will describe the record layout for a single month of data.

In order to eliminate duplicate data, the general principle followed here is to eliminate all unedited variables that also exist in edited form. All source codes that are carried in recoded or edited fields are also eliminated.

In order to reduce the number of variables on SIPP files, several variables have been eliminated. All check items have been eliminated. They carry information that is from other parts of the questionnaire or control card and are not edited. Creating person-month records also reduces the number of variables by a factor of four. A single record layout describes all of the variables available for a single month. That record is then repeated for each month. The current SIPP files contain all four months of data on a single record.

Defining the Monthly Record

There are certain structural elements of the current record layout that are useful to maintain in the person-month record. Household and family characteristics and aggregates are difficult to create regardless of how the file is structured, and there is little reason for each user to independently derive these aggregates. Thus the beginning of each monthly record shows the household, family, and subfamily characteristics created by the Census Bureau. Following those are person characteristics.

There are three basic kinds of person characteristics collected in the SIPP data: 1) demographic characteristics such as age, marital status, and education; 2) labor force and recipiency characteristics collected in section 1 of the questionnaire; and 3) job and income characteristics collected in sections 2 and 3 of the questionnaire.

The first set of person characteristics at the monthly level are the standard age, sex, race, and education variables. In addition, this section shows critical status characteristics like interview status and reason for exit are carried. The demographic characteristics are followed by a series of labor force participation items which describe the weekly labor force data that go into the monthly employment status recode (ESR). The ESR variable defines monthly labor force participation in eight categories. Weekly labor force data are recoded into a similar employment status variable. This section also carries a set of income recodes for total income, earnings, property income, means-tested cash transfers, and other income.

Data on jobs held follow the labor force participation data, and some editing is needed to adequately present these data. Currently SIPP carries space for two wage and salary jobs and two self-employment jobs for each individual. This is done because it is possible for a person to have more than one job during the four month period. For example, anyone who changes employer during the reference period is considered to have two jobs during the four months. It is also possible for a person to hold two jobs simultaneously (dual job holders). The difficulty that arises from this is that there is no simple way to distinguish job 1 from job 2. For some respondents it represents a change in employer and job 1 covers the first two months of the reference period and job 2 the last two months. For others, both jobs are held simultaneously. For still others, the two jobs are held simultaneously for a brief period of transition from one to the other. Each interviewer is instructed about which job to list as job 1 and job 2; however, no edit is performed to make sure those rules are followed. In addition, the instructions give the interviewer a choice of listing first the job lasting the longest or the job earning the most money.

These same situations can occur in any given month, although the chances for confusion are somewhat less. In this file, data for job 1 and job 2 will be presented for dual job holders. In all other cases the job for which the person earned the most money during the 4 month period will be listed as job 1 and job 2 will be the job for which the person earned the second largest amount of money during the monthly periods. There will also be a new recode created indicating whether this person has job information for 0, 1, or 2 jobs this month. This same procedure will be used for persons with more than one reported self-employment job in a given month. Earnings for each job are presented separately.

Data on each of the 35 sources of other income collected in SIPP follow the data on self-employment. This section contains a single field for each income source, and imputation flags that show that an amount was imputed.

The last section of the monthly record contains information on asset income. Asset income is collected as a single amount for the four month period, and in most cases for a set of income sources. Asset income also is collected for both joint and individual recipiency. For example, a single amount is collected for individual interest income received during the four month reference period. That amount includes interest from regular

savings accounts (ISS100), money market deposit accounts (ISS101), certificates of deposit (ISS102), and interest from NOW or super NOW accounts (ISS103). A second amount is recorded for one member of the household on interest from those sources where the account was owned jointly with another adult member of the household.

The asset income section contains a monthly value for each of the amounts collected in the questionnaire. The reference period amount is divided by four to get the monthly amount. In addition, joint income is split evenly between husband and wife. This section also carries an indicator for each source of income. If an individual has interest from both a regular savings account and a NOW account, both will be indicated. Of course, there is no way to allocate the income to these sources separately since separate information was not collected to begin with.

Geographic Coverage

State codes are shown except for nine States which are identified in three groups. A subsample of metropolitan residents is identified along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's). The sample was not designed to produce State or MSA/CMSA level estimates. State codes are primarily useful in relating a respondent's recipiency of benefits to thresholds which may vary from State to State. MSA/CMSA codes may be used in relating respondent characteristics with contextual variables.

Identification Number System

The SIPP identification scheme is designed to uniquely identify individuals in each wave, provide a means of linking the same individuals over time, and group individuals into households and families over time.

The various components of the identification scheme are listed below:

Sample Unit Identification Number
Address ID
Entry Address ID
Person Number

The sample unit identification number was created by scrambling together the PSU, segment, and serial numbers used for Census Bureau administrative purposes. This identifier is constructed the same way on each wave regardless of moves, to enable matching from wave to wave.

The two-digit address ID code identifies each household associated with the same sample unit identification number. The first digit of the address ID code indicates the wave in which that address was first assigned for interview. The second digit sequentially numbers multiple households that have the same serial number. The address ID code is 11 for all sample addresses that are the same as in Wave 1. As SIPP sample persons move to new addresses, new address ID codes are assigned. Any new address to which sample unit members moved during Wave 4 is numbered in the 40's.

The person ID is a five-digit number consisting of the two-digit entry address ID and a three-digit person number. Person numbers 101, 102, etc., are assigned in Wave 1; 201, 202, etc., are assigned to persons added to the roster in Wave 2, and so forth. This five-digit number is not changed or updated, regardless of moves.

The sampling unit serial number and address ID code uniquely identifies each household in any given wave. The sampling unit serial number can link all households in subsequent waves back to the original Wave 1 household.

Topcoding of Income Variables

To protect against the possibility that a user might recognize the identity of a SIPP respondent with very high income, income from every source is "topcoded" so that no individual income amounts above $100,000 are revealed. While the data dictionary indicates a topcode of $33,332 for monthly income, this topcode will rarely

be used. In most cases the monthly income is shown as an individual dollar amount of $8,333, with $8,333 actually representing "$8,333 or more." (the $100,000 annual income topcode is $8,333 multiplied by 12 months). Individual monthly amounts above $8333 may occasionally be shown if the respondent's income varied considerably from month to month, as long as the average does not exceed $8,333. For example, if a respondents' income from a single job were concentrated in only one of the four reference months, a figure as high as $33,332 could be shown. (Income from interest or property have lower topcodes).

Summary income figures on the person, family, and household records are simple sums of the components shown on the file after topcoding, and are not independently topcoded. Thus, a person with high income from several sources (jobs, businesses, property) could have aggregate monthly income well over the topcode for each source. Families and households with a number of high income members could theoretically have aggregate income shown well over $100,000, though well below the $1.5 million shown as the highest allowable value in the data dictionary.

The user is cautioned against trying to make much use of the occasional monthly figures above $8,333, except in calculating aggregates or observing patterns across the 4-month period for a single individual, family, or household. Those units with higher monthly amounts shown are a biased sample of high income units, more likely to include units with income from multiple sources than other units with equally high aggregate income which comes from a single source.

Longitudinal Household Research Using This File

This information is designed to provide the basis for longitudinal household analyses using SIPP data. It presents pertinent concepts and a discussion of the five variables which can be used to identify longitudinal households, and persons in longitudinal households.

A longitudinal household is defined as follows:

1. It is a household which existed during at least one month.

2. The household continues from one month to the next if it has the same household reference person (henceforth referred to as "householder") and householder's spouse (if present in the household), and if it is the same household type.

3. The householder (or spouse of householder) must be a 100-level person, that is, a person who was a member of a household interviewed during the first wave for this to be considered a longitudinal household.

4. The household types are married-couple household; other family household, male householder; other family household, female householder; nonfamily household, male householder; nonfamily household, female householder.

Several variables are included on the longitudinal research file for use in analysis of longitudinal households. These variables were calculated for and placed on each person's monthly records for the months that they were in sample. The longitudinal household variables are LGTHHTYP (which identifies the type of longitudinal household); LGTKEY (identifies the household number on the householder's record and, if a spouse of the householder is present, on the spouse's record); LGTOTH (identifies the household number on the records of persons who were not the householder or the spouse of the householder in that longitudinal household); and, LGTFAC1 and LGTFAC2, two experimental factors for use in weighting longitudinal households.

For information on the use of the longitudinal household variables, contact Donald Hernandez in Population Division, U.S. Bureau of the Census, Washington, D.C. 20233. Phone: (301) 457-2353.

LGTFAC1 and LGTFAC2 are experimental factors intended to provide the basis for exploratory household estimates. The "Source and Accuracy" chapter in this document provides information on their use.

Longitudinal households can be constructed by examining all the records within one original sample unit, "SU-ID." For each month link together all persons in that SU-ID who have the non-zero LGTKEY or LGTOTH value. Then link together all these persons' records for each month that they have the same nonzero value for LGTKEY or LGTOTH. Longitudinal household analyses may then be performed on these records remembering to use the weight LGTFAC1 or LGTFAC2 from only one household member.

Analyses of longitudinal households should be conducted using a specially constructed extract subfile. This subfile might include household variables based on characteristics of some or all of the members of the longitudinal household during a given month or other time period, but the subfile should include only one record per longitudinal household per month (or other time period, depending on the analytical unit of time of interest to the user). Since this research file is a "person record" file, it would be incorrect to use every record in the file for a household analysis. If each person record were used as if it were a household record, results would be incorrect because each household would be represented in the analysis "x" times, where "x" is the number of household members in the household during a specified month.

GLOSSARY OF SELECTED TERMS

Absent 1 or more weeks. Absent 1 or more weeks means absent without pay from a job or business. Persons were absent without pay in a month if they were 'with a job' during the entire month, but were not at work at that job during at least 1 full week (Sunday through Saturday) during the month, and did not receive wages or a salary for any time during that week. Reasons for an unpaid absence include vacation, illness, layoff, bad weather, labor disputes, and waiting to start a new job.

Family household. A family household is a household maintained by a family; any unrelated persons (unrelated subfamily members and/or secondary individuals) who may be residing there are included. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives.

Family. A family is a group of two or more persons (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such persons (including related subfamily members) are considered members of one family.

Farm-nonfarm residence. The farm population refers to rural residents living on farms. Under this definition, a farm is any place in rural territory from which sales of crops, livestock, and other agricultural products amounted to $1,000 or more during the previous 12-month period.

Full-time and part-time. The data on full- and part-time workers pertain to the number of hours a person usually worked per week during the weeks worked in the 4-month reference period of the survey. If the hours worked per week varied considerably, the respondent was asked to report an approximate average of the actual hours worked each week.

Persons 16 years old and over who reported usually working 35 or more hours each week during the weeks they worked are classified as 'full-time' workers; persons who reported that they usually worked fewer than 35 hours are classified as 'part-time' workers. The same definitions are used in the CPS.

Household. A household consists of all persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is either (1) direct access from the outside or through a common hall or (2) a kitchen or cooking equipment for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit or a group of unrelated persons sharing a housing unit as partners is also counted as a household. The count of households excludes group quarters. Examples of group quarters include rooming and boarding houses, college dormitories, and convents and monasteries.

Householder. Survey procedures call for listing first the person (or one of the persons) in whose name the home is owed or rented. If the house is owned jointly by a married couple, either the husband or the wife may be listed first, thereby becoming the reference person, or householder, to whom the relationship of the other household members is recorded. One person in each household is designated as the 'householder.' The number of householders, therefore, is equal to the number of households.

Layoff. In general, the word 'layoff' means release from a job because of slack work, material shortages, inventory taking, plant remodeling, installation of machinery, or other similar reasons. For this survey, persons were also on 'layoff' who did not have job but who responded that they has spent at least 1 week on layoff from a job and that they were available to accept a job.

In addition, persons were on 'layoff' in a given month if they were 16 years old or over and (a) were 'with a job' but 'absent without pay' from that job for at least 1 full week during that month, and (b) they responded that their main reason for being absent from their job or business was 'layoff.' 'On layoff' also includes a small number of persons who responded that they were waiting to report to a new wage and salary job that was to begin within 30 days. In other words, persons waiting to begin a new job are classified together with persons waiting to return to a job from which they have been laid off.

Looking for work. Persons who 'looked for work' in a given month are those who were 16 years old or over and (a) were without a job during at least 1 week during the month, (b) tried to get work or establish a business or profession in that week, and (c) were available to accept a job. Examples of jobseeking activities are (1) registering at a public or private employment office, (2) meeting with prospective employers, (3) investigating possibilities for starting a professional practice or opening a business, (4) placing or answering advertisements, (5) writing letters of application, and (6) being on a professional register.

The CPS uses a similar concept of 'looking for work.' The term 'unemployed' as used in the CPS includes persons who were looking for work in the reference week and those who were 'on layoff' or 'waiting to begin a new job in 30 days."

Low-Income Home Energy Assistance Program. Benefits from the Federally funded LIHEAP authorized by Title XXVI of the Omnibus Budget Reconciliation Act of 1981, or comparable assistance provided through State funded assistance programs, may be received in the form of direct payment to the household as reimbursement for heating or cooling expenses or paid directly to the fuel dealer or landlord.

Means-tested benefits. The term means-tested benefits refers to programs that require the income or assets (resources) of the individual or family be below specified guidelines in order to qualify for benefits. These programs provide cash and noncash assistance to the low-income population. The major sources of means-tested cash and noncash assistance are shown in Appendix B-2.

Medicaid. This term refers to the Federal-State program of medical assistance for low-income individuals and their families as provided for by Title XIX of the Social Security Act. The phrase 'Medicaid covered' refers to persons enrolled in the Medicaid program, regardless of whether they actually utilized any Medicaid covered health care services during the survey reference period.

Medicare. This term refers to the Federal Health Insurance Program for the Aged and Disabled as provided for by Title XVIII of the Social Security Act. The phrase 'Medicare covered' refers to persons enrolled in the Medicare program, regardless of whether they actually utilized any Medicare covered health care services during the survey reference period.

Monthly income. The monthly income estimates for households are based on the sum of the monthly income received by each household member age 15 years old or over.

Cash income includes all income received from any of the sources listed in Appendix B-1. Rebates, refunds, loans, and capital gain or loss amounts from the sale of assets, and interhousehold transfers of cash such as allowances are not included. Accrued interest on Individual Retirement Accounts, KEOUGH retirement plans. and U.S. Savings bonds are also excluded. This definition differs somewhat from that used in the annual income reports based on the March CPS income supplement questionnaire. These data, published in the Consumer Income Series, P-60, are based only on income received in a regular or periodic manner and, therefore, exclude lump-sum or one-time payments such as inheritances and insurance settlements. The March CPS income definition, however, does exclude the same income sources excluded by SIPP.

The income amounts represent amounts actually received during the month, before deductions for income and payroll taxes, union dues, Part B Medicare premiums, etc.

The SIPP income definition includes three types of earnings: wages and salary, nonfarm self-employment, and farm self-employment. The definition of nonfarm self-employment and farm self-employment is not based on the net difference between gross receipts or sales and operating expenses, depreciation, etc. The monthly amounts for these income types are based on the salary or other income received from the business by the owner of the business or farm during the 4-month reference period.

The Bureau of Labor Statistics publishes quarterly averages for an earnings concept called 'usual weekly earnings' for employed wage and salary workers. The concept differs from the SIPP earnings concept since it is based on usual, not actual earnings, excludes the self-employed, and excludes earnings from secondary jobs.

While the income amounts from most sources are recorded monthly for the 4-month reference period, property income amounts, interest, dividends, rental income, etc., were recorded as totals for the 4-month period. These totals were distributed equally between months of the reference period for purposes of calculating monthly averages.

Nonfamily household. A nonfamily household is a household maintained by a person living alone or with nonrelatives only.

Persons of Spanish origin. Persons of Spanish origin were determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (or the origin of some other household member) from a 'flash card' listing ethnic origins. Persons of Spanish origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin. It should be noted that persons of Spanish origin may be of any race.

Population coverage. The estimates are restricted to the civilian noninstitutional population of the 50 States and members of the Armed Forces living off post or with their families on post.

Race. The population is divided into groups on the basis of race: White; Black; American Indian, Eskimo, or Aleut; Asian or Pacific Islander; and 'other races.'

Special Supplemental Food Program for women, Infants, and Children (WIC). Benefits are received in the form of vouchers that are redeemed at retail stores for specific supplemental nutritious foods. Eligible low-income recipients are infants and children up to age five and pregnant, postpartum, and breastfeeding women.

Unemployment compensation. This term refers to cash benefits paid to unemployed workers through a State or local unemployment agency. These include all benefits paid under the Federal-State unemployment insurance program as established under the Social Security Act, as well as those benefits paid to State and local government employees, Federal civilian employees, and veterans.

With a Job. Persons are classified 'with a job' in a given month if they were 16 years old or over and, during the month, either (a) worked as paid employees or worked in their own business or profession or on their own farm or worked without pay in a family business or farm or (b) were temporarily absent from work either with or without pay. In general, the word 'job' implies an arrangement for regular work for pay where payment is in cash wages or salaries, at piece rates, in tips, by commission, or in kind (meals, living quarters, supplies received). 'Job' also includes self-employment at a business, professional practice, or farm. A business is defined as an activity which involves the use of machinery or equipment in which money has been invested or an activity requiring an office or 'place of business' or an activity which requires advertising; payment may be in the form of profits or fees.

The Current Population Survey (CPS), the official source of labor force statistics for the Nation, uses the same definition for a job or business. The term 'with a job,' however, should not be confused with the term 'employed' as used in the CPS. 'With a job' includes those who were temporarily absent from a job because of layoff and those waiting to begin a new job in 30 days; in the CPS these persons are not considered 'employed.' See 'Worked each week' below.

With labor force activity. The term 'with labor force activity' includes all persons with a job (as defined above) and those looking for work or on layoff from a job for at least 1 week during a given month. Conversely, those persons 'with no labor force activity' had no job, were not on layoff from a job and made no effort to find a job during the month.

Work disability. Persons were classified as having a work disability if they were identified by the respondent as having a physical, mental, or other health condition that limits the kind or amount of work they can do.

Worked each week. Persons 'worked each week' in a month if, for the entire month, they were 'with a job' and not 'absent without pay' from the job. In other words, a person worked each week in any month when they were (a) on the job the entire month, or (b) they received wages or a salary for all weeks in the month, whether they were on the job or not. Persons also worked each week if they were self-employed and spent time during each week of the month at or on behalf of the business or farm they owned, as long as they received or expected to receive profit or fees for their work.

In the CPS, the concept at 'work' includes those persons who spent at least 1 hour during the reference week at their job or business. In the CPS, however, 'at work' does not include persons who were temporarily absent from their jobs during the entire reference week on paid vacation, sick leave, etc. In SIPP, 'worked each week' does include persons on paid absences.

HOW TO USE THE DATA DICTIONARY

The Data Dictionary describes the contents and record layout of the public-use computer tape file. The first line of each data item description gives the data name, size of the data field, and the begin position of the field.

The next few lines contain descriptive text and any applicable notes. Categorical value codes and labels are given where needed. Comment notes marked by an (*) are provided throughout. Comments should be removed from the machine-readable version of the data dictionary before using it to help access the data file.

    Data. Alphabetic, numeric, and the special character (-). No other special characters are used. It may be a mnemonic such as "STATE" or "SE1-OCC", or a sequential identifier such as "SC1176" or "WS-IMP01". Data item names are unique throughout the entire file.

    Size. Numeric. The size of a data item is given in characters. Indication of implied decimal places is provided in notes.

    Begin. Numeric. Contains the location in the data record of the first character position of the data item field.

The first line of each data item description begins with the character "D" (left-justified, two characters). The "D" flag indicates lines in the data dictionary containing the name, size, relative begin and begin position of each data item. This information (in machine-readable form) can be used to help access the data file. The line beginning with the character "U" describes the universe for that item. Lines containing categorical value codes and labels follow next and begin with the character "V". The special character (.) denotes the start of the value labels. Two examples of data item descriptions follow:

```
D SC1218    1  2805
        What was the main reason ... could
        not take a job during those weeks
U Persons 15 years old or older
V       0 .Not in universe
V       1 .Already had a job
V       2 .Temporary illness
V       3 .School
V       4 .Other

D RR3064    2  3760
        Railroad retirement sends out two types
        of checks; which color check does ...
        receive.
U Persons age 15 years or older receiving
  railroad retirement
V      -1 .DK
V      00 .Not in universe
V      01 .Blue
V      02 .Buff
V      03 .Direct deposit
V      04 .Other
```

SIPP 1991 FULL PANEL DATA DICTIONARY ON TAPE AND CD-ROM

DATA	SIZE	BEGIN	INDEX	LENGTH

D SUSEQNUM   6   1   1   6
Sequence number of person
Primary sort key
Range = (000001:120000)

Scrambled identifier
Range = (000000001:999999999)
U All persons

D PP-ENTRY   2   17   1   2
Edited entry address ID
Address ID of the household that this
person belonged to at the time this
person first became part of the sample
Range = (11:99)
U All persons

D PP-PNUM   3   19   1   3
Edited person number
Range = (101:999)
U All persons

D SU-TOTPP   2   22   1   2
Total number of person records
for this sample unit
Range = (01:60)
U All persons

D PP-RCSEQ   2   24   1   2
Sequence number of person record within
sample unit
Range = (01:60)
U All persons

D HH-ADDID   64   26   32   2
Address ID. - This field identifies the
household this person lived in this
month
Range = (00:99)
U All persons

D PP-INTVW   8   90   8   1
Person's interview status for the
relevant interview
Range = (0:4)
U All persons
V   0 .Not applicable (children under
V   .15), not in sample, nonmatch
V   1 .Interview (self)
V   2 .Interview (proxy)
V   3 .Noninterview - type Z refusal
V   4 .Noninterview - type Z other

D PP-MIS   32   98   32   1
Person's interview status for this month
Range = (0:2)
U All persons
V   0 .Not matched or not in sample
V   1 .Interview
V   2 .Non-interview

D REASLEFT   8   130   8   1
Preedited reason for leaving the
household
Control card item 23
Subscript 1: Not applicable for
observation 1
Subscript 2 - 8: Reason left in
observations 2 - 8
Range = (0:9)
U Persons who left at any time during
  the reference period
V   0 .Not applicable or not answered
V   .or nonmatch
V   1 .Left - deceased
V   2 .Left - institutionalized
V   3 .Left - living in Armed Forces
V   .barracks
V   4 .Left - moved outside of country
V   5 .Left - separation or divorce
V   6 .Left - person #201 or greater no
V   .Longer living with sample person
V   7 .Left - other
V   8 .Entered merged household
V   9 .Interviewed in previous wave but
V   .not in sample

D HHINSTAT   64   138   32   2
Control card item 368 - interview
status code
Range = (00:06,23:26)
U All persons
V   00 .Not defined for this wave
V   01 .Interviewed
   Type A Noninterview
V   02 .No one home
V   03 .Temporarily absent
V   04 .Refused
V   05 .Unable to locate
V   06 .Other
   Type C Noninterview
V   23 .Entire household out-of-scope
   Type D Noninterview
V   24 .Moved, address unknown
V   25 .Moved within country beyond
V   .limit
V   26 .All sample persons relisted on
V   .new

SOURCE AND ACCURACY STATEMENT FOR THE SURVEY OF INCOME AND PROGRAM PARTICIPATION (SIPP) 1991 LONGITUDINAL PANEL FILE

DATA COLLECTION AND ESTIMATION

Source of Data. The data were collected during the 1991 panel of the Survey of Income and Program Participation (SIPP). The SIPP universe is the noninstitutionalized resident population living in the United States. This population includes persons living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates and nursing home residents, were not eligible to be in the survey. Also, United States citizens residing abroad were not eligible to be in the survey. Foreign visitors who work or attend school in this country and their families were eligible; all others were not eligible to be in the survey. With the exceptions noted above, persons who were at least 15 years of age at the time of the interview were eligible to be in the survey.

The 1991 panel SIPP sample is located in 230 Primary Sampling Units (PSUs) each consisting of a county or a group of contiguous counties. Within these PSUs, expected clusters of 2 or 4 living quarters (LQs) were systematically selected from lists of addresses prepared for the 1980 decennial census to form the bulk of the sample. To account for LQs built within each of the sample areas after the 1980 census, a sample was drawn of permits issued for construction of residential LQs up until shortly before the beginning of the panel. In jurisdictions that do not issue building permits, small land areas were sampled and the LQs within were listed by field personnel and then subsampled. In addition, sample LQs were selected from supplemental frames that included LQs identified as missed in the 1980 census and group quarters.

At the time of the initial visit, the occupants of about 14,300 living quarters were interviewed. This accounts for approximately 74% of the living quarters originally designated for sample. Approximately 19% of the designated living quarters were found to be vacant, demolished, converted to nonresidential use, or otherwise ineligible for the survey. The remainder, approximately 1300 living quarters, were not interviewed because the occupants refused to be interviewed, could not be found at home, were temporarily absent, or were otherwise unavailable. Thus, occupants of about 92% of all eligible living quarters participated in the first interview of the survey.

For later interviews, only original sample persons (those in Wave 1 sample households and interviewed in Wave 1) and persons living with them were eligible to be interviewed. With certain restrictions, original sample persons were to be followed even if they moved to a new address. When original sample persons moved without leaving a forwarding address or moved to extremely remote parts of the country and no telephone number was available, additional noninterviews resulted.

Sample households within the panel are divided into four subsamples of nearly equal size. These subsamples are called rotation groups 1, 2, 3, or 4 and one rotation group is interviewed each month. Each household in the sample was scheduled to be interviewed at 4 month intervals over a period of roughly 2 2/3 years beginning in February 1991. The reference period for the questions is the 4-month period preceding the interview month. In general, one cycle of four interviews covering the entire sample, using the same questionnaire, is called a wave.

The period covered by the 1991 longitudinal panel file consists of 32 interview months (eight interviews) conducted from February 1991 to September 1993. Data for up to 32 reference months are available for persons on the file. Specific months available depend on the person's rotation group and his/her sample entry or exit date. However, data from all four rotation groups (i.e., the full sample) are available only for reference months January 1991 through May 1993, inclusive. Also note that the availability of data on household composition begins with the first interview month of a rotation group.

Table 1 indicates the reference months and interview months for the collection of data from each rotation group of the 1991 longitudinal panel file. For example, rotation group 2 was first interviewed in February 1991 and data for the reference months October 1990 through January 1991 were collected. This rotation group was interviewed for the eighth and last time in June 1993 to collect data for February 1993 through May 1993. Table 1 also shows that 1991 calendar year (91CY) data were collected in interview months February 1991 to April 1992 and that 1992 calendar year (92CY) data were collected exactly one year later. Data from all four rotation groups are available for each reference month of the 1991 and 1992 calendar years.

In the 1984-1990 panels, the longitudinal weighting process treated persons with at least one missing interview as noninterviewed and assigned them zero weights. This procedure resulted in the loss of a large amount of collected survey data. To increase the reliability of longitudinal estimates and make more use of collected data, we introduced a "missing wave imputation" procedure.

The 1991 panel is the first panel to benefit from the new imputation procedure. We now impute missing wave data for persons who miss an interview (wave) and have completed interviews before and after the missing wave. For example, persons who were not interviewed in wave 3 but interviewed in waves 2 and 4 will have their wave 3 data imputed based on waves 2 and 4 data to identify the noninterview cases that were imputed. There is an imputation flag field on the 1991 Longitudinal panel file named "WAVFLG" to identify the noninterview cases that were imputed. For the 1991 panel, this imputation procedure has increased the number of positively weighted sample cases by 8.5% for the panel, and 5.7% and 4.7% for the 1991 and 1992 calendar years, respectively.

For panel, 91CY, and 92CY weighting procedures, a person was classified as interviewed or noninterviewed based on the following definitions. (NOTE: A person may be classified differently for calculating different weights). Interviewed sample persons (including children) were defined to be:

1) those for whom self, proxy, or imputed responses were obtained for each month of the appropriate longitudinal period, or

2) those for whom self or proxy responses were obtained for the first month of the appropriate longitudinal period and self, proxy, or imputed responses exist for each subsequent month until they were known to have died or moved to an ineligible address (foreign living quarters, institutions, or military barracks).

The months for which persons were deceased or residing in an ineligible address were identified on the file. Noninterviewed persons were defined to be those for whom neither self nor proxy responses were obtained for one or more months of the appropriate longitudinal period (excluding imputed persons and persons who died or moved to an ineligible address).

It is estimated that roughly 40,800 persons were initially designated in the sample. Approximately 37,300 persons were interviewed in wave 1; while the balance, residing in the 1300 living quarters not interviewed at wave 1 remained anonymous and became the initial source of person nonresponse in the weighting procedures. For the panel and 91CY weighting procedures, the eligible sample is considered to be all persons initially designated for sample. In the panel weighting procedure, approximately 30,600 persons were classified as interviewed with a person nonresponse rate of 25%. The 91CY weighting procedure classified about 33,200 persons as interviewed and had a person nonresponse rate of 19%. The longitudinal file contains approximately 44,400 persons in all. This includes the wave 1 interviewed persons and about 6,900 persons who entered survey households during the panel through births, marriages, and other reasons. Approximately one-half of the newcomers were considered eligible for the 92CY weighting procedure; increasing the eligible sample size to roughly 43,200 persons. The 92CY weighting procedure classified about 32,000 persons as interviewed with a person nonresponse rate of 26%. Some respondents did not respond to some of the questions; therefore, item nonresponse rates, especially for sensitive income and money related items, are higher than the person nonresponse rates given above.

ESTIMATION

In the estimation procedure described below, all persons classified as interviewed for a given longitudinal period, i.e., panel, 91CY, or 92CY, are assigned positive weights for that period, while those classified as noninterviewed are assigned zero weights.

Estimation of Person Characteristics. Essentially the same estimation procedure was used to derive each of the three sets of SIPP longitudinal person weights. Several stages of weight adjustments were involved. Each person received a base weight equal to the inverse of his/her probability of selection. Two noninterview adjustment factors were applied. One adjusted the weights of interviewed persons in interviewed households to account for persons who were eligible for the sample but could not be interviewed at the first interview. The second was applied to compensate for person noninterviews occurring in subsequent interviews. Another factor was applied to each interviewed person's weight to account for the SIPP sample areas not having the same population distribution as the strata from which they were selected.

An additional stage of adjustment to longitudinal person weights was performed to reduce the mean square error of the survey estimates. This was accomplished by bringing the sample estimates into agreement with monthly Current Population Survey (CPS) type estimates of the civilian (and some military) noninstitutional population of the United States by age, sex, race, Hispanic ethnicity, and householder/not householder status as of the specified control date. The control dates for the panel, 91CY, and 92CY weights were March 1, 1991, January 1, 1991, and January 1, 1992, respectively. The CPS estimates were themselves brought into agreement with estimates from the 1980 decennial census which have been adjusted to reflect births, deaths, immigration, emigration, and changes in the Armed Forces since 1980.

Use of Person Weights. Users should be forewarned to apply the appropriate weights given on this file before attempting to calculate estimates. The weights vary between units due to weighting adjustments, and following movers. If analysis is done for the general population without applying the appropriate weights, the results will be erroneous. Each person on the 1991 longitudinal panel file has three longitudinal person weights (some of which may be zero) for estimation of panel, 91CY and 92CY person characteristics and two longitudinal household factors to be used only for exploratory estimates of household and family characteristics. We strongly recommend that all nonexploratory analysis be confined to person analysis using the longitudinal person weights. For example, using 91CY person weights, one can estimate the number of persons receiving food stamps from January through March of 1991. Also, we recommend the use of longitudinal person weights for person characteristics based on household attributes. For example, using panel person weights, one can estimate the number of persons living in households which received food stamps during the period covered by the 1991 panel.

This file was created for purposes of survey research and evaluation, and the Bureau of the Census will continue to examine the data, correcting and improving the computer processing and estimation procedures where appropriate. We welcome and appreciate any research on your part that will help us achieve this goal.

All estimates may be divided into two broad categories: longitudinal and cross-sectional. Longitudinal estimates require that data records for each person be linked across interviews, where as cross-sectional estimates do not. For example, annual income estimates obtained by summing the 12 monthly income amounts for each person would require linking records and so would be longitudinal estimates. Because there is no linkage between interviews, cross-sectional estimates can combine data from different interviews only at the aggregate level. Longitudinal person weights were developed for longitudinal estimation, but may be used for cross-sectional estimation as well. However, note that wave files with cross-sectional weights are also produced for the SIPP. Because of the larger sample size available on the wave files, it is recommended that these files be used for cross-sectional estimation, if possible.

In this section it is assumed that all four rotation groups are used for estimation. If an estimate covers a time period for which data from some rotation groups are unavailable, refer to the section "Adjusting Estimates Which Use Less Than the Full Sample."

Some basic types of longitudinal and cross-sectional estimates which can be constructed using longitudinal person weights are described below in terms of estimated numbers. Of course, more complex estimates, such as percents, averages, ratios, etc., can be constructed from the estimated numbers. Longitudinal person weights can be used to construct the following types of longitudinal estimates:

1.   The number of persons who have ever experienced a characteristic during a given time period.

      To construct such an estimate, use the longitudinal person weight (panel, 91CY, or 92CY) for the shortest time period which covers the time period of interest, summing the weights over all persons who possessed the characteristic of interest at some point during the time period of interest. For example, to estimate the number of persons who ever received food stamps during the last six months of 1991 use the 91CY longitudinal person weight.

2.   The amount of a characteristic accumulated by persons during a given time period.

      To construct such an estimate, use the longitudinal person weight for the shortest time period which covers the time period of interest. Then compute the product of the weight times the amount of the characteristic and sum this product over all appropriate persons. For example, to estimate the aggregate 1991 annual income of persons who were employed during all 12 months of the year use the 91CY longitudinal person weight.

3.   The average number of consecutive months of possession of a characteristic (i.e., the average spell length for a characteristic) during a given time period.

For example, one could estimate the average length of each spell of receiving food stamps during 1991. Also, one could estimate the average spell of unemployment that elapsed before a person found a new job. To construct such an estimate, first identify the persons who possessed the characteristic at some point during the time period of interest. Then, create two sums of these person's appropriate longitudinal weights: (1) sum the product of the weight times the number of months the spell lasted and (2) sum the weights only. Now, the estimated average spell length in months is given by (1) divided by (2). A person who experienced two spells during the time period of interest would be treated as two persons and appear twice in sums (1) and (2). An alternate method of calculating the average can be found in the section "Standard Error of a Mean or Aggregate."

4. The number of month-to-month changes in the status of a characteristic (i.e., number of transitions) summed over every set of two consecutive months during the time period of interest. To construct such an estimate, sum the appropriate longitudinal person weight each time a change is reported between two consecutive months during the time period of interest. For example, to estimate the number of persons who changed from receiving food stamps in July 1991 to not receiving in August 1991 add together the 91CY longitudinal person weights of each person who had such a change. To estimate the number of changes in monthly salary income during the third quarter of 1991 sum together the estimate of number of persons who made a change between July 1 and August 1, between August 1 and September 1, and between September 1 and October 1.

Note that spell and transition estimates should be used with caution because of the biases that are associated with them. Sample persons tend to report the same status of a characteristic for all four months of a reference period. This tendency results in a bias toward reported spell lengths that are multiples of four months. This tendency also affects transition estimates in that, for many characteristics, the number of characteristics, the number of month-to-month transitions reported between the last month of one reference period and the first month of the next reference period are much greater than the number of reported transitions between any two months within a reference period. Additionally, spells extending before or after the time period of interest are cut off (censored) at the boundaries of the time period. If they are used in estimating average spell length, a downward bias will result.

Also using longitudinal person weights one can construct the following type of cross-sectional estimate:

5. Monthly estimates of a characteristic averaged over a number of consecutive months.

For example, one could estimate the monthly average number of food stamp recipients over the months July through December 1991. To construct such an estimate, first form an estimate for each month in the time period of interest. Use the longitudinal 91CY person weight, summing over all persons who possessed the characteristic of interest during the month of interest. Then, sum the monthly estimates and divide by the number of months.

Estimation of Household Characteristics. The Census Bureau has not developed Household and family weights for longitudinal analysis. However, to facilitate exploratory research based upon the Census Bureau's provisional longitudinal household definition, two different longitudinal household weights, termed adjustment factor 1 and adjustment factor 2, were created for each longitudinal household each month. These factors were then assigned to every member of the longitudinal household each month. The primary difference between the factors is that for married-couple households adjustment factor 1 was derived jointly from the panel longitudinal person weights of the householder and spouse, while adjustment factor 2 was derived solely from the panel longitudinal person weight of the householder.

For each month, five data fields are included on the longitudinal panel file to facilitate creation of household level estimates: (1) current household type, (2) key person, (3) other household member, (4) adjustment factor 1, (5) adjustment factor 2. Definitions of fields (1) through (3) as well as the provisional definitions of longitudinal household, original household, and successor household are provided below. In this section "month" refers to reference month unless stated otherwise.

LONGITUDINAL HOUSEHOLD: A longitudinal household is a household which exists during at least one month, but which may continue to exist for more than one month. A longitudinal household continues from one month to the next, if it has the same householder (and spouse, if present in the household), and if it is the same household type, where household type is defined below.

CURRENT HOUSEHOLD TYPE: Households are classified by type in the current month where household types are: (1) married-couple household, (2) other family household, male householder, (3) other family household, female householder, (4) non-family household, male householder, (5) non-family household, female householder.

ORIGINAL HOUSEHOLD: A household existing at the beginning of the survey, i.e., a household which exists during the first interview month of the rotation group.

SUCCESSOR HOUSEHOLD: A household which is not an original household but which does exist during at least one month as an off-shoot of an original household. A successor household must exist during at least one month succeeding the first interview month of the rotation group, and must have a key person (see definition below) who was a member of an original household.

KEY PERSON: In married-couple longitudinal households both the householder and the householder's spouse are key persons. In all other types of longitudinal households, there is only one key person - the householder. In married-couple households at least one key person must have entered the sample at Wave 1. In all other household types, the key person must have entered the sample at Wave 1.

OTHER HOUSEHOLD MEMBER: A person who, during a specific month, is a member of a longitudinal household but is not a key person.

Adjustment factors 1 and 2 are presented in figure 1. In examining figure 1, keep the following principles in mind: Adjustment factors 1 and 2 are always derived from the panel longitudinal person weight(s) of an original householder (and/or key person). For every successor household, where the current month householder (and/or spouse) was a member of an original household, it is the householder (and/or spouse) of the original household who supplies the panel longitudinal person weight from which the adjustment factors are derived.

Figure 1.   Adjustment Factors for Longitudinal Household Estimates - 1991 Longitudinal Panel File

	ORIGINAL HOUSEHOLDS		SUCCESSOR HOUSEHOLDS					
	Married Couple	Other	Married Couple				Other	
			HHer entered sample in Wave 1		HHer entered sample in Wave 2+		HHer entered sample in Wave 1	HHer entered sample in Wave 2+
			Other KP entered sample in Wave 1	Other KP entered sample in Wave 2+	Other KP entered sample in Wave 1	Other KP entered sample in Wave 2+		
AF1	mean LPW of two key persons	LPW of HHer	first monthly value of AF1	½ first monthly value of AF1	½ first monthly value of AF1	Zero¹	first monthly value of AF1	Zero¹
AF2	LPW of HHer	LPW of HHer	first monthly value of AF2	first monthly value of AF2	Zero¹	Zero¹	first monthly value of AF2	Zero¹

AF1 = Adjustment factor 1;
AF2 = Adjustment factor 2;
LPW = Panel longitudinal person weight;
Wave 2+ = Wave 2 or later wave
HHer = Current month householder;
KP = Current month key person

Note: The situation where a successor household is formed by the merging of two Wave 1 households is not covered in figure 1. Original sample persons who move into another sample household cannot be linked to their original household and so are treated as if they entered the sample in Wave 2+.

Use of Household Weights. Adjustment factor 1, adjustment factor 2, and the related data fields are intended to provide the basis for exploratory household and family estimates. For example, by using adjustment factor fields for key persons (in married couple households, one key person must be selected) with additional variables, estimates pertaining to longitudinal households can be derived for statements equivalent to the following: "During the period from month 'A' to month 'B', there were 'C' households with characteristics 'D'." An example of such a statement would be: "During the period from January to December 1991, there were 'C' households which received food stamps for 10 or more months." All such estimates should be considered exploratory, because the adjustment factors do not explicitly take into account several possible sources of bias, including differential attrition from the sample, with the result that the estimates may,

---

¹ These cells are added for completeness. By definition, these are not successor households.

even as national estimates, be subject to substantial bias. The purpose of including these data fields on the longitudinal panel file is to facilitate analyses that may be useful in developing improved longitudinal household weights. Although the exploratory adjustment factors may be useful for other purposes, the Census Bureau intends that these factors be used for only this one purpose.

Exploratory household (family) estimates can be formed using either adjustment factor 1 or adjustment factor 2. At present, there is insufficient evidence to recommend one factor over the other in any given situation. To form exploratory household (family) estimates, use the adjustment factor deemed appropriate, summing over all households (families) possessing the characteristic of interest. Note that both adjustment factors for a household will remain the same for each month the household exists. Therefore, the appropriate adjustment factor for a household can be taken from any month of a household's existence. Also, note that the adjustment factors assigned to each member of a household actually apply to the entire household. As an example of the use of these adjustment factors, suppose one had an independent estimate of the number of households which received food stamps for 10 months or more during 1991 and wanted to compare it to the SIPP estimate. To construct the SIPP estimate, first, using appropriate data fields (e.g., current household type, key person), identify all households which existed for exactly 10, 11, and 12 months during 1991; then sum adjustment factor 1 or adjustment factor 2 over all of the identified households which received food stamps for the appropriate time period.

Adjusting Estimates Which Use Less Than the Full Sample. All four rotation groups of data are not available for reference months October through December 1990 and June through August 1993 (see table 1). If the time period of interest for a given estimate (of person or household characteristics) includes these months, the estimate may need to be adjusted in some way to account for the missing rotation groups. For longitudinal estimates (types 1-4) this adjustment factor equals four divided by the number of rotation groups contributing data. For example, if the time period of interest for a given estimate is December 1990, then data will be available only from rotation groups 2, 3, and 4. Therefore, a factor of 4/3 = 1.3333 will be applied. To estimate the number of persons ever unemployed in the fourth quarter of 1990, only data from rotation group 2 are available. Thus, a factor of 4/1 = 4 will be applied.

Note that, if the given estimate is an average of monthly estimates (estimate type 5), then the number of rotation groups and the factor used will be determined independently for each month in the average and the adjusted monthly estimates will be averaged together in the usual way. For example, to estimate the average number of persons unemployed per month in the fourth quarter of 1990, the October, November, and December data will be multiplied by 4/1, 4/2, and 4/3 respectively before being summed together and divided by three.

ACCURACY OF ESTIMATES

SIPP estimates are based on a sample; they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaire, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey: nonsampling and sampling. We are able to provide estimates of the magnitude of SIPP sampling error, but this is not true of nonsampling error. Found in the next sections are descriptions of sources of SIPP nonsampling error, followed by a discussion of sampling error, its estimation, and its use in data analysis.

Note that estimates from this sample for individual states are subject to very high sampling errors and are not recommended. The state codes on the file are primarily of use for linking respondent characteristics with appropriate contextual variables (e.g., state-specific welfare criteria) and for tabulating data by user-defined groupings of states.

Nonsampling Errors. Nonsampling errors can be attributed to many sources, e.g., inability to obtain information about all cases in the sample; definitional difficulties; differences in the interpretation of questions; inability or unwillingness on the part of the respondents to provide correct information; inability to recall information, errors made in the following: collection such as in recording or coding the data, processing the data, estimating values for missing data; biases resulting from the differing recall periods caused by the rotation pattern used; and undercoverage. Quality control and edit procedures were used to reduce errors made by respondents, coders and interviewers. More detailed discussions of the existence and control of nonsampling errors in the SIPP can be found in the SIPP Quality Profile.

Undercoverage in SIPP results from missed living quarters and missed persons within sample households. It is known that undercoverage varies with age, race, and sex. Generally, undercoverage is larger for males than for females and larger for Blacks than for Nonblacks. Ratio estimation to independent age-race-sex population controls partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that persons in missed households or missed persons in interviewed households have characteristics different from those of interviewed persons in the same age-race-sex group. Further, the independent population controls used have not been adjusted for undercoverage in the decennial census. The Bureau has used complex techniques to adjust the weights for nonresponse. For an explanation of the techniques used, see the Nonresponse Adjustment Methods for Demographic Surveys at the U.S. Bureau of the Census, November 1988, Working paper 8823, by R. Singh and R. Petroni. An example of successfully avoiding bias can be found in "Current Nonresponse Research for the Survey of Income and Program Participation" (paper by Petroni, presented at the Second International Workshop on Household Survey Nonresponse, October 1991).

Comparability with Other Estimates. Caution should be exercised when comparing data from this file with data from other SIPP publications or with data from other surveys. The comparability problems are caused by such sources as the seasonal patterns for many characteristics, different nonsampling errors, and different concepts and procedures. Refer to the SIPP Quality Profile for known differences with data from other sources and further discussion.

Sampling Variability. Standard errors indicate the magnitude of the sampling error. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The standard errors for the most part measure the variations that occurred by chance because a sample rather than the entire population was surveyed.

USES AND COMPUTATION OF STANDARD ERRORS

Confidence Intervals. The sample estimate and its standard error enable one to construct confidence intervals, ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 90 percent of the intervals from 1.645 standard errors below the estimate to 1.645 standard errors above the estimate would include the average result of all possible samples.

2. Approximately 95 percent of the intervals from 1.960 standard errors below the estimate to 1.960 standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Hypothesis Testing. Standard errors may also be used for hypothesis testing, a procedure for distinguishing between population characteristics using sample estimates. The most common types of hypotheses tested are 1) the population characteristics are identical versus 2) they are different. Tests may be performed at various levels of significance, where a level of significance is the probability of concluding that the characteristics are different when, in fact, they are identical.

To perform the most common test, compute the difference $X_A - X_B$, where X_A and X_B are sample estimates of the characteristics of interest. A later section explains how to derive an estimate of the standard error of the difference $X_A - X_B$. Let that standard error be s_{DIFF}. If $X_A - X_B$ is between -1.645 times s_{DIFF} and +1.645 times s_{DIFF}, no conclusion about the characteristics is justified at the 10 percent significance level. If, on the other hand, $X_A - X_B$ is smaller than -1.645 times s_{DIFF} or larger than +1.645 times s_{DIFF}, the observed difference is significant at the 10 percent level. In this event, it is commonly accepted practice to say that the characteristics are different. We recommend that users report only those differences that are significant at the 10 percent level or better. Of course, sometimes this conclusion will be wrong. When the characteristics are, in fact, the same, there is a 10 percent chance of concluding that they are different.

Note that as more tests are performed, more erroneous significant differences will occur. For example, at the 10 percent significance level, if 100 independent hypothesis tests are performed in which there are no real differences, it is likely that about 10 erroneous differences will occur. Therefore, the significance of any single test should be interpreted cautiously.

Note Concerning Small Estimates and Small Differences. Because of the large standard errors involved, there is little chance that estimates will reveal useful information when computed on a base smaller than 200,000. Also, nonsampling error in one or more of the small number of cases providing the estimate can cause large relative error in that particular estimate. Therefore, care must be taken in the interpretation of small differences since even a small amount of nonsampling error can cause a borderline difference to appear significant or not, thus distorting a seemingly valid hypothesis test.

Standard Error Parameters. Most SIPP estimates have greater standard errors than those obtained through a simple random sample because clusters of living quarters are sampled for the SIPP. To derive standard errors that would be applicable to a wide variety of estimates and could be prepared at a moderate cost, a number of approximations were required. Estimates with similar standard error behavior were grouped together and two parameters (denoted "a" and "b") were developed to approximate the standard error behavior of each group of estimates. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate. These "a" and "b" parameters vary by characteristic and by demographic subgroup to which the estimate applies.

Computation of Standard Error Parameters. In this section we discuss the adjustment of base "a" and "b" parameters to provide "a" and "b" parameters appropriate for each type of longitudinal and cross-sectional estimate described in the section "Use of Person Weights." Later sections will discuss the use of the adjusted parameters in various formulas to compute standard errors of estimated numbers, percents, averages, etc. Tables 4, 5 and 6 provide the base "a" and "b" parameters needed to compute the

approximate standard errors for estimates using panel, 91CY, and 92CY weights, respectively. (Users should be aware that these parameters are preliminary and may be revised in the future.) Table 7 provides additional factors to be used for averages of monthly cross-sectional estimates. These factors are needed for two reasons: the monthly estimates are correlated and averaging over a greater number of monthly estimates will produce an average with a smaller standard error. Table 8 gives correlations between quarterly and yearly averages of cross-sectional estimates. These correlations are used in the formula for the standard error of a difference (formula (11)). If household estimates have been produced using the adjustment factor 1 or adjustment factor 2, then follow the procedures described below, but use the household "a" and "b" parameters in table 4.

The creation of appropriate "a" and "b" parameters for the previously discussed types of estimates are described below. Again, it is assumed that all four rotation groups are used in estimation. If not, refer to the section "Adjusting Standard Errors of Estimates Which Use Less Than the Full Sample."

1. The number of persons who have ever experienced a characteristic during a given time period.

   The appropriate "a" and "b" parameters are taken directly from table 4, 5 or 6. The choice of parameter depends on whether panel, 91CY, or 92CY weights were used, on the characteristic of interest, and on the demographic subgroup of interest.

2. Amount of a characteristic accumulated by persons during a given time period.

   The appropriate "b" parameters are also taken directly from table 4, 5 or 6.

3. The average number of consecutive months of possession of a characteristic per spell (i.e., the average spell length for a characteristic) during a given time period.

   Start with the appropriate base "a" and "b" parameters from table 4, 5 or 6. The parameters are then inflated by an additional factor, g, to account for persons who experience multiple spells during the time period of interest. This factor is computed by:

$$g = \frac{\sum_{i=1}^{n} m_i^2}{\sum_{i=1}^{n} m_i} , \qquad (1)$$

8—14

where there are n persons with at least one spell and m_i is the number of spells experienced by person i during the time period of interest.

4. The number of month-to-month changes in the status of a characteristic (i.e., number of transitions) summed over every set of two consecutive months during the time period of interest.

   Obtain a set of adjusted "a" and "b" parameters exactly as just described in 3, then multiply these parameters by an additional factor. Use 1.0000 if the time period of interest is two months and 2.0000 for a longer time period. (The factor of 2.0000 is based on the conservative assumption that each spell produces two transitions within the time period of interest.)

5. Monthly estimates of a characteristic averaged over a number of consecutive months.

   Appropriate base "a" and "b" parameters are taken from table 4, 5 or 6. If more than one longitudinal weight has been used in the monthly average, then there is a choice of parameters from tables 4, 5 and 6. Choose the table which gives the largest parameter. Next multiply the base "a" and "b" parameters by the factor from table 7 corresponding to the number of months in the average.

Adjusting Standard Error Parameters for Estimates which Use Less Than the Full Sample. If some rotation groups are unavailable to contribute data to a given estimate, then the estimate and its standard error need to be adjusted. The adjustment of the estimate is described in a previous section. The standard error of a longitudinal estimates (types 1-4) is adjusted by multiplying the appropriate "a" and "b" parameters by a factor equal to four divided by the number of rotation groups contributing data to the estimate. Note that the parameters for the standard error of an average must still be adjusted according to this rule, even though the average itself is unaffected by the adjustment for missing rotation groups.

For the standard error of cross-sectional estimates which cover only one month, the factor can be computed as just described or it can be taken from table 3 where the factor is given for each single reference month, October 1990 to August 1993. For the standard error of quarterly averages of monthly estimates which use less than the full sample, special factors are used, also given in table 3 for the fourth quarter of 1990 to the second quarter of 1993.

As an example, suppose we want a standard error for the estimated number of females who have ever received food stamps during the fourth quarter of 1990. The appropriate "a" and "b" parameters are -0.0003068 and 26,142, respectively, (from table 4). Because only one rotation group is available for this estimate (see table 1), a factor of 4/1 = 4.000 would be applied to obtain final "a" and "b" parameters of -0.0012272 and 104,568,

respectively. Suppose that instead, we were interested in the cross-sectional estimate of the average monthly number of female food stamp recipients for the fourth quarter of 1990. In that case a factor of 1.8519 (from table 3) would be applied to obtain final "a" and "b" parameters of -0.0005682 and 48,412, respectively. Note that only panel "a" and "b" parameters will be affected by this adjustment; no such adjustment is ever needed for 91CY and 92CY parameters since the full sample is available for all months in calendar years 1991 and 1992.

Standard Errors of Estimated Numbers. The approximate standard error of an estimated number can be obtained by using formula (2):

$$s_x = \sqrt{ax^2 + bx} \tag{2}$$

Here x is the estimated number and "a" and "b" are the parameters associated with the particular type of characteristic for the appropriate longitudinal time period, i.e., panel, 91CY, or 92CY.

<u>Illustration.</u> Suppose the SIPP estimate of the number of persons ever receiving Social Security during the first three months of 1991 is 34,122,000. (This estimate is obtained using the 91CY weights.) The appropriate "a" and "b" parameters to use in calculating a standard error for the estimate are obtained from table 5. They are a = -0.0001484, b = 24,380, respectively. Using formula (2), the approximate standard error is

$$\sqrt{(-0.0001484)(34,122,000)^2 + (24,380)(34,122,000)} = 812,000 \; persons$$

The 90-percent confidence interval as shown by the data is from 32,786,260 to 35,457,740. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90 percent of all samples. Similarly, using twice the standard error, we could conclude that the average estimate derived from all possible samples lies within the interval 32,530,480 to 35,713,520 with 95 percent confidence.

Standard Error of a Mean or Aggregate. A mean is defined here to be the average quantity of some characteristic (other than the number of persons, families, or households) per person, family, or household. An aggregate is defined to be the total quantity of some characteristic summed over all units in a subpopulation. For example, a mean could be the average annual income of females age 25 to 34; an aggregate, the total annual income for that subpopulation. The standard error of a mean can be approximated by formula (3) below and the standard error of an aggregate can be approximated by formula (4). Because of the approximations used in developing

formulas (3) and (4), an estimate of the standard error of the mean or aggregate obtained from these formulas will generally underestimate the true standard error.

The formula used to estimate the standard error of a mean, $\bar{x}$, is

$$s_{\bar{x}} = \sqrt{\frac{b}{y} s^2} ,$$ (3)

where y is the base, s^2 is the estimated population variance of the characteristic and b is the "b" parameter associated with the particular type of characteristic. The standard error of an aggregate k is estimated by:

$$s_k = \sqrt{b\, y\, s^2} .$$ (4)

The population variance, s^2, may be estimated by one of two methods: the first method uses data that has been grouped into intervals, the second method uses ungrouped data. The second method is recommended because it is more precise. However, the first method will be easier to implement if grouped data is already being used as part of the analysis. In both methods it is assumed x_i is the value of the characteristic for person i.

To use the first method, the range of values for the characteristic is divided into c intervals, where the lower and upper boundaries of interval j are Z_{j-1} and Z_j, respectively. Each person is placed into one of the c groups such that the value of the characteristic is between Z_{j-1} and Z_j. The estimated population variance, s^2, is then given by:

$$s^2 = \sum_{j=1}^{c} p_j\, m_j^2 - \bar{x}^2,$$ (5)

where p_j is the estimated proportion of persons in group j (based on weighted data), and $m_j = (Z_{j-1} + Z_j) / 2$. The most representative value of the characteristic in group j is assumed to be m_j. If group c is open-ended, i.e., no upper interval boundary exists, then an approximate value for m_c is

$$m_c = \left(\frac{3}{2}\right) Z_{c-1}.$$

The mean, $\bar{x}$, can be obtained using the following formula:

$$\bar{x} = \sum_{j=1}^{c} p_j m_j \tag{6}$$

In the second method, the estimated population variance is given by

$$s^2 = \frac{\sum_{i=1}^{n} w_i x_i^2}{\sum_{i=1}^{n} w_i} - \bar{x}^2, \tag{7}$$

where there are n sample persons with the characteristic of interest and w_i is the final weight for person i (note that $\sum w_i = y$). The mean, $\bar{x}$, can be obtained from the formula

$$\bar{x} = \frac{\sum_{i=1}^{n} w_i x_i}{\sum_{i=1}^{n} w_i}. \tag{8}$$

Illustration of Method 1. Suppose that the 1991 distribution of annual incomes is given in table 2 for persons aged 25 to 34 who were employed for all 12 months of 1991.

The mean annual cash income from formula (6) is

$$\bar{x} = \frac{1,371}{39,851}(2,500) + \frac{1,651}{39,851}(6,250) + ... + \frac{1,493}{39,851}(105,000) = \$26,717.$$

Using formula (5) and the mean annual cash income of \$26,717 the estimated population variance, s^2, is

$$s^2 = \frac{1,371}{39,851}(2,500)^2 + \frac{1,651}{39,851}(6,250)^2 + ... + \frac{1,493}{39,851}(105,000)^2 - (26,717)^2 = 468,331,633.$$

The appropriate "b" parameter from table 5 is 8,312. Now, using formula (3), the estimated standard error of the mean is

$$s_{\bar{x}} = \sqrt{\frac{8,312}{39,851,000}(468,331,633)} = \$313$$

Illustration of Method 2. Suppose that we are interested in estimating the average length of spells of food stamp recipiency during the calendar year 1991 for a given subpopulation. Also, suppose there are only 10 sample persons in the subpopulation who were food stamp recipients. (This example is for illustrative purposes only; actually, 10 sample cases would be too few for a reliable estimate.) The number of consecutive months of food stamp recipiency during 1991 and the 91CY weights are given below for each sample person:

Sample Person	Spell Length (in months)	Final Weight
1	4,3	5,300
2	5	7,100
3	9	4,900
4	3,3,2	6,500
5	12	9,200
6	12	5,900
7	4,1	7,600
8	7	4,200
9	6	5,500
10	4	5,700

Using formula (8), the average spell of food stamp recipiency is estimated to be

$$\bar{x} = \frac{(5300)(4) + (5300)(3) + \dots + (5700)(4)}{5300 + 5300 + \dots + 5700}$$

$$= 473,100/87,800$$

$$= 5.4 \; months$$

The standard error will be computed by formula (3). First, the estimated population variance can be obtained by formula (7):

$$s^2 = \frac{(5300)(4)^2 + (5300)(3)^2 + \dots + (5700)(4)^2}{5300 + 5300 + \dots + 5700} - (5.4)^2$$

$$= 12.4 \; (months)^2$$

Next, the base "b" parameter of 24,380 is taken from table 5 and multiplied by the factor computed from formula (1):

$$g = \frac{2^2 + 1 + 1 + 3^2 + 1 + 1 + 2^2 + 1 + 1 + 1}{2 + 1 + 1 + 3 + 1 + 1 + 2 + 1 + 1 + 1}$$

$$= 1.71$$

Therefore, the final "b" parameter is 41,690 and the standard error of the mean is

$$s = \sqrt{\frac{41,690}{87,800}} \ (12.4) = 2.4 \ months$$

Standard Errors of Estimated Percentages. This section refers to the percentages of a group of persons, families, or households possessing a particular attribute and to percentages of money or related concepts. The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are over 50 percent. For example, the percent of employed persons is more reliable than the estimated number of employed persons. When the numerator and denominator of the percentage have different parameters, use the parameter of the numerator. If proportions are presented instead of percentages, note that the standard error of a proportion is equal to the standard error of the corresponding percentage divided by 100.

There are two types of percentages commonly estimated. The first type is the percentage of persons sharing a particular characteristic such as the percentage of persons owning their own home or the percentage of January food stamp recipients who were also receiving food stamps in July. The second type is the percentage of money or some similar concept held by a particular group of persons or held in a particular form. Examples are the percentage of wealth held by persons with high income and the percentage of annual income received by females.

For the percentage of persons, the approximate standard error, $s_{(x,p)}$, of the estimated percentage, p, can be obtained by the formula:

$$S_{(x,p)} = \sqrt{\frac{b}{x}(p)(100-p)}.$$ (9)

Here x is the base of the percentage, p is the percentage ($0 < p < 100$), and b is the "b" parameter for the numerator.

<u>Illustration</u>. Suppose that an estimated 46,023,000 males were employed in July 1991 and an estimated 2.4 percent of them became unemployed in August 1991. The base "b" parameter is 8,312 (from table 5). Using formula (9) and the appropriate "b" parameter, the approximate standard error is

$$\sqrt{\frac{(8,312)}{(46,023,000)}(2.4)(100-2.4)} = 0.21 \ percent$$

Consequently, the 90-percent confidence interval as shown by these data is from 2.1 to 2.7 percent.

For percentages of money, a more complicated formula is required. A percentage of money will usually be estimated in one of two ways. It may be the ratio of two aggregates:

$p_M = (X_A/X_N) \times 100$

or it may be the ratio of two means with an adjustment for different bases:

$$p_M = p_A \left(\frac{\bar{x}_A}{\bar{x}_N} \right) 100$$

where x_A and X_N are aggregate money figures, $\bar{x}_A$ and $\bar{x}_N$ are mean money figures,

and p_A is the estimated number in group A divided by the estimated number in group N. In either case, we estimate the standard error as

$$s_M = \sqrt{\left(\frac{\hat{p}_A \bar{x}_A}{\bar{x}_N}\right)^2 \cdot \left[\left(\frac{s_p}{\hat{p}_A}\right)^2 + \left(\frac{s_A}{\bar{x}_A}\right)^2 + \left(\frac{s_N}{\bar{x}_N}\right)^2\right]} \qquad (10)$$

where s_p is the standard error of $\hat{p}_A$, s_A is the standard error of $\bar{x}_A$ and s_N is the standard error of $\bar{x}_N$. To calculate s_p, use formula (9). The standard errors of $\bar{x}_N$ and $\bar{x}_A$ are calculated using formula (3).

Note that there is frequently some correlation between the characteristics estimated by $\hat{p}_A$, $\bar{x}_N$, and $\bar{x}_A$. These correlations, if present, will cause a tendency towards overestimates or underestimates, depending on the relative sizes of the correlations and whether they are positive or negative.

Illustration. Suppose that in October 1991 an estimated 8.8% of males 16 years and over were black, the mean monthly earnings of these black males was $1288, the mean monthly earnings of all males 16 years and over was $1911, and the corresponding standard errors are .37%, $36, and $27. Then, the percent of male earnings made by blacks in October 1991 is:

$$p_M = .088 \left(\frac{1288}{1911}\right) x \ 100$$

$$= 5.9\%$$

Using formula (10), the approximate standard error is:

$$s_M = \sqrt{\left(\frac{(.088)(1288)}{1911}\right)^2 \left[\left(\frac{.0037}{.0880}\right)^2 + \left(\frac{36}{1288}\right)^2 + \left(\frac{27}{1911}\right)^2\right]}$$

$$= 0.31\%$$

<u>Standard Error of a Difference</u>. The standard error of a difference between two sample estimates, x and y, is equal to

$$s_{(x-y)} = \sqrt{s_x^2 + s_y^2 - 2rs_xs_y} \qquad (11)$$

where s_x and s_y are the standard errors of the estimates x and y. The estimates can be numbers, averages, percents, ratios, etc. The correlation between x and y is represented by r. Some estimated correlations are given in table 8. These correlations apply only to cross-sectional estimates of the same characteristic at two points of time. The cross-sectional estimates must be monthly estimates averaged over quarters or years (see the section "Use of Person Weights" for a discussion of cross-sectional estimates). Correlations are given for both person and household characteristics. If no correlation has been provided for a given set of x and y estimates, then assume r = 0. If r is assumed to be zero and the true correlation is really positive (negative), then this assumption will result in a tendency towards overestimates (underestimates) of the true standard error.

<u>Illustration</u>. Suppose that we are interested in the difference in the average monthly number of males vs. females with monthly cash income above $5,000 in 1991. An estimate of the number of persons in this income bracket has been obtained for each month of both males and females. Averaging the 12 monthly estimates for 1991 produces an estimate of 1,619,000 for the average number of females in this monthly income bracket during 1991 (based on 91CY weights). The similar estimate for males is 2,000,000 (based on 91CY weights). The difference in estimates is 381,000.

The standard error of the female estimate is computed next. Base "a" and "b" parameters from table 5 for females are -0.0000861 and 8,312, respectively. Because 12 monthly estimates were used in the average, these parameters are multiplied by a factor of 0.86 from table 7 to yield final parameters of -0.0000740 and 7,148. Using formula (2), the standard error of the female estimate is

$$\sqrt{(-0.0000740)(1,619,000)^2 + (7,148)(1,619,000)} = 107,000.$$

In a similar manner, using parameters from table 5, the standard error of the male estimate is 107,000. Now, the standard error of the difference is computed using the above two standard errors. The correlation r for this example is 0. The standard error of the difference is computed by formula (11):

$$\sqrt{(107,000)^2 + (107,000)^2} = 151,000.$$

Suppose that it is desired to test at the 10 percent significance level whether the average number of males and females with monthly cash income above $5,000 were different in 1991. To perform the test, compare the difference of 381,000 to the product 1.645 x 151,000 = 248,000. Since the difference is larger than 1.645 times the standard error of the difference, the data show that the two sexes are significantly different at the 10 percent level.

Standard Error of a Median. The median quantity of some item such as income for a given group of persons, families, or households is that quantity such that at least half the subpopulation have as much or more and at least half the group have as much or less. The sampling variability of an estimated median depends upon the form of the distribution of the item as well as the size of the subpopulation.

The median, like the mean, can be estimated using either data which has been grouped into intervals or ungrouped data. If grouped data are used, the median is estimated using formulas (12) or (13) with p = 0.5. If ungrouped data are used, the data records are ordered based on the value of the characteristic, then the estimated median is the value of the characteristic such that the weighted estimate of 50 percent of the subpopulation falls at or below that value and 50 percent is at or above that value. Note that the method of standard error computation which is presented here requires the use of grouped data. Therefore, it should be easier to compute the median by grouping the data and using formulas (12) or (13).

An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section "Confidence Intervals".) The following procedure may be used to estimate the 68-percent confidence limits and hence the standard error of a median based on sample data.

1. Determine, using formula (9), the standard error of an estimate of 50 percent of the group;

2. Add to and subtract from 50 percent the standard error determined in step 1;

3. Using the distribution of the item within the group, calculate the quantity of the item such that the percent of the group owning more is equal to the smaller percentage found in step 2. This quantity will be the upper limit for the 68-percent confidence interval. In a similar fashion, calculate the quantity of the item such that the percent of the group owning more is equal to the larger percentage found in step 2. This quantity will be the lower limit for the 68-percent confidence interval (note that a median computed from ungrouped data may or may not fall in this confidence interval);

4. Divide the difference between the two quantities determined in step 3 by two to obtain the standard error of the median.

To perform step 3, it will be necessary to interpolate. Different methods of interpolation may be used. The most common are simple linear interpolation and Pareto interpolation. The appropriateness of the method depends on the form of the distribution around the median. We recommend Pareto interpolation in most instances. Interpolation is used as follows. The quantity of the item such that "p" percent own more is

$$X_{pN} = \exp\left[\left(Ln\left(\frac{pN}{N_1}\right) \Big/ Ln\left(\frac{N_2}{N_1}\right)\right) Ln\left(\frac{A_2}{A_1}\right)\right] A_1 \tag{12}$$

if Pareto Interpolation is indicated and

$$X_{pN} = \left[\frac{pN - N_1}{N_2 - N_1}\right](A_2 - A_1) + A_1 \tag{13}$$

if linear interpolation is indicated, where

N   is the size of the group,

A_1 and A_2 are the lower and upper bounds, respectively, of the interval in which X_{pN} falls,

N_1 and N_2 are the estimated number of group members owning more than A_1 and A_2, respectively,

exp   refers to the exponential function and

Ln   refers to the natural logarithm function.

It should be noted that a mathematically equivalent result is obtained by using common logarithms (base 10) and antilogarithms.

Illustration. To illustrate the calculations for the standard error of a median, we return to the first example used to illustrate the standard error of a mean. The median annual income for this group is computed by formula (12) to be $18,317. The size of the group is 39,851,000.

1. Using formula (9) and the appropriate "b" parameter of 8,312, the standard error of 50 percent on a base of 39,851,000 is about 0.5 percentage points.

2. Following step (2), the two percentages of interest are 49.5 and 50.5.

3. By examining table 2, we see that the percentage 49.5 falls in the income interval from $17,500 to $19,999. (Since 55.5 percent receive $17,500 or more per year, but only 40.9 percent receive $20,000 or more per year, the quantity that exactly 49.5 percent receive more than must be between $17,500 and $19,999.) Thus $A_1 = \$17,500$, $A_2 = \$19,999$, $N_1 = 22,117,000$, and $N_2 = 16,299,000$. Implementing Pareto interpolation, the upper bound of a 68-percent confidence interval for the median is

$$\exp\left(\frac{Ln[(0.495)(39,851,000)/(22,117,000)]}{Ln[(16,299,000)/(22,117,000)]} \; Ln\frac{(19,999)}{(17,500)}\right) 17,500$$

$$= \$18,414.$$

Also by examining table 2, we see that the percentage of 50.5 falls in the same income interval. Thus, A_1, A_2, N_1, and N_2 are the same as above. The lower bound of a 68-percent confidence interval for the median is

$$\exp\left(\frac{Ln[(0.505)(39,851,000)/(22,117,000)]}{Ln[(16,299,000)/(22,117,000)]} \; Ln\frac{(19,999)}{(17,500)}\right) 17,500$$

$$= \$18,222.$$

and the 68-percent confidence interval on the estimated median of $18,317 is from $18,222 to $18,414. An approximate standard error is

$$\frac{\$18,414 - \$18,222}{2} = \$96.$$

If linear interpolation is used, the median is estimated using formula (13) to be $18,441 and the 68-percent confidence interval of the estimated median is from $18,338 to $18,544. The approximate standard error is $103.

Standard Errors of Ratios of Means or Medians. The standard error for a ratio of means or medians is approximated by formula (14):

$$s_{\frac{x}{y}} = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{s_x}{x}\right)^2 + \left(\frac{s_y}{y}\right)^2\right]}$$

(14)

where x and y are the means or medians, and s_x and s_y are their associated standard errors. Formula (14) assumes that the means or medians are not correlated. If the correlation between the population means or medians estimated by x and y are actually positive (negative), then this procedure will tend to produce overestimates (underestimates) of the true standard error for the ratio of means or medians.

APPENDIX A-1

Income Source Code List

Code Income Sources

1 - Social Security
2 - U.S. Government Railroad Retirement pay
3 - Federal Supplemental Security Income (SSI)
5 - State unemployment compensation
6 - Supplemental Unemployment Benefits
7 - Other unemployment compensation (Trade Adjustment Act benefits, strike pay, other)
8 - Veterans compensation or pensions
10 - Worker's compensation
12 - Employer or union temporary sickness policy
13 - Payments from a sickness, accident or disability insurance policy purchased on your own
20 - Aid to Families with Dependent Children (AFDC, ADC)
21 - General assistance or General relief
23 - Foster child care payments
24 - Other welfare
25 - WIC (Women, Infants and Children) Nutrition Program
27 - Food stamps
28 - Child support payments
29 - Alimony payments
30 - Pension from company or union
31 - Federal Civil Service or other Federal civilian employee pensions
32 - U.S. Military retirement pay
34 - State government pensions
35 - Local government pensions
36 - Income from paid-up life insurance policies or annuities
37 - Estates and trusts
38 - Other payments for retirement, disability or survivor
40 - G.I. Bill/VEAP education benefits
41 - Other VA educational assistance
50 - Income assistance from a charitable group
51 - Money from relatives or friends
52 - Lump sum payments
53 - Income from roomers or boarders
54 - National Guard or Reserve pay
55 - Incidental or casual earnings
56 - Other cash income not included elsewhere
75 - Categories combined and recoded for confidentiality reasons
      State Administered Supplemental Security Income (old code 4)
      Black lung payments (old code 9)
      State temporary sickness or disability benefits (old code 11)
      Indian, Cuban, or Refugee Assistance (old code 22)
      National Guard or Reserve Force retirement (old code 33)

Code Asset List

100 - Regular/passbook savings accounts in a bank, savings and loan or credit union
101 - Money market deposit accounts
102 - Certificates of Deposit or other savings certificates
103 - NOW, Super NOW or other interest earning checking accounts
104 - Money market funds
105 - U.S. Government securities
106 - Municipal or corporate bonds
107 - Other interest-earning assets
110 - Stocks or mutual fund shares
120 - Rental property

173 - Medicaid
174 - U.S. Saving Bonds (E, EE)
175 - College Work Study
176 - PELL Grant
177 - Supplemental Educational Opportunity Grant (SEOG)
178 - National Direct Student Loan (NSL)
179 - Guaranteed Student Loan
180 - JTPA Training
181 - Employer assistance
182 - Fellowship/Scholarship
183 - Other financial aid
200 - VA disability rating of 100%
201 - VA disibility of less than 100%

APPENDIX A-2

Income Sources Included in Monthly Cash Income

Earnings from Employment

Wages and salaries
Nonfarm self-employment income
Farm self-employment income

Income from Assets (Property Income)

Regular/passbook savings accounts in a bank, savings and loan or credit union
Money market deposit accounts
Certificates of Deposit or other savings certificates
NOW, Super NOW or other interest-earning checking accounts
Money market funds
U.S. Government securities
Municipal or corporate bonds
Other interest-earning assets
Stocks or mutual fund shares
Rental property
Mortgages
Royalties
Other financial investments

Other Income Sources

Social Security
U.S. Government Railroad Retirement pay
Federal Supplemental Security Income (SSI)
State Administered Supplemental Security Income
State unemployment compensation
Supplemental Unemployment Benefits
Other unemployment compensation (Trade Adjustment Act benefits, strike pay, other)
Veterans compensation or pensions
Black lung payments
Worker's compensation
State temporary sickness or disability benefits
Payments from a sickness, accident or disability insurance policy purchased on your own
Aid to Families with Dependent Children (AFDC, ADC)
General Assistance or General Relief
Indian, Cuban, or Refugee Assistance
Foster child care payments
Other welfare
Child support payments
Alimony payments
Pension from company or union
Federal Civil Service or other Federal civilian employee pensions
U.S. Military retirement pay
National Guard or Reserve Forces retirement
State government pensions
Local government pensions
Income from paid-up life insurance policies or annuities
Estates and trusts

Other payments for retirement, disability or survivor benefits
G.I. Bill/VEAP education benefits
Income assistance from a charitable group
Money from relatives or friends
Lump sum payments
Income from roomers or boarders
National Guard or Reserve pay
Incidental or casual earnings
Other cash income not included elsewhere

APPENDIX A-3

Sources of Means-Tested Benefits Covered in SIPP

Cash Benefits

Federal Supplemental Security Income (SSI)
State Administered Supplemental Security Income
Veterans' pensions
Aid to Families with Dependent Children (AFDC, ADC)
General Assistance or General Relief
Indian, Cuban, or Refugee Assistance
Other welfare
Foster child care payments

Noncash Benefits

Food Stamps
Special Supplemental Food Program for Women, Infants, and Children (WIC)
Low-Income Home Energy Assistance
Medicaid
Free or reduced price school lunches
Free or reduced price school breakfasts
Public or subsidized rental housing

APPENDIX A-4

1990 Census of Population Occupation Classification System

The list presents the occupational classification developed for the 1990 Census of Population and Housing. There are 501 categories for the employed with 1 additional category for the experienced unemployed and 3 additional categories for the Armed Forces. These categories are grouped into 6 summary groups and 13 major groups. The classification is developed from the 1980 Standard Occupational Classification. "n.e.c." is the abbreviation for not elsewhere classified.

1990 Census code	Occupation category
	MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS
	Executive, Administrative, and Managerial Occupations
003	Legislators (111)
004	Chief executives and general administrators, public administration (112)
005	Administrators and officials, public administration (1132-1139)
006	Administrators, protective services (1131)
007	Financial managers (122)
008	Personnel and labor relations managers (123)
009	Purchasing managers (124)
013	Managers, marketing, advertising, and public relations (125)
014	Administrators, education and related fields (128)
015	Managers, medicine and health (131)
016	Postmasters and mail superintendents (1344)
017	Managers, food serving and lodging establishments (1351)
018	Managers, properties and real estate (1353)
019	Funeral directors (pt 1359)
021	Managers, service organizations, n.e.c. (127, 1352, 1354, pt 1359)
022	Managers and administrators, n.e.c. (121, 126, 132-1343, 136-139)
	Management Related Occupations
023	Accountants and auditors (1412)
024	Underwriters (1414)
025	Other financial officers (1415, 1419)
026	Management analysts (142)
027	Personnel, training, and labor relations specialists (143)
028	Purchasing agents and buyers, farm products (1443)
029	Buyers, wholesale and retail trade except farm products (1442)
033	Purchasing agents and buyers, n.e.c. (1449)
034	Business and promotion agents (145)
035	Construction inspectors (1472)
036	Inspectors and compliance officers, except construction (1473)
037	Management related occupations, n.e.c. (149)

MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS—Con.

Professional Specialty Occupations

Engineers, Architects, and Surveyors
043   Architects (161)

Engineers
044   Aerospace (1622)
045   Metallurgical and materials (1623)
046   Mining (1624)
047   Petroleum (1625)
048   Chemical (1626)
049   Nuclear (1627)
053   Civil (1628)
054   Agricultural (1632)
055   Electrical and electronic (1633, 1636)
056   Industrial (1634)
057   Mechanical (1635)
058   Marine and naval architects (1637)
059   Engineers, n.e.c. (1639)
063   Surveyors and mapping scientists (164)

Mathematical and Computer Scientists
064   Computer systems analysts and scientists (171)
065   Operations and systems researchers and analysts (172)
066   Actuaries (1732)
067   Statisticians (1733)
068   Mathematical scientists, n.e.c. (1739)

Natural Scientists
069   Physicists and astronomers (1842, 1843)
073   Chemists, except biochemists (1845)
074   Atmospheric and space scientists (1846)
075   Geologists and geodesists (1847)
076   Physical scientists, n.e.c. (1849)
077   Agricultural and food scientists (1853)
078   Biological and life scientists (1854)
079   Forestry and conservation scientists (1852)
083   Medical scientists (1855)

Health Diagnosing Occupations
084   Physicians (261)
085   Dentists (262)
086   Veterinarians (27)
087   Optometrists (281)
088   Podiatrists (283)
089   Health diagnosing practitioners, n.e.c. (289)

Health Assessment and Treating Occupations
095   Registered nurses (29)
096   Pharmacists (301)
097   Dietitians (302)

Therapists
098   Respiratory therapists (3031)
099   Occupational therapists (3032)
103   Physical therapists (3033)

MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS—Con.

Professional Specialty Occupations—Con.

104	Speech therapists (3034)
105	Therapists, n.e.c. (3039)
106	Physicians' assistants (304)

Teachers, Postsecondary

113	Earth, environmental, and marine science teachers (2212)
114	Biological science teachers (2213)
115	Chemistry teachers (2214)
116	Physics teachers (2215)
117	Natural science teachers, n.e.c. (2216)
118	Psychology teachers (2217)
119	Economics teachers (2218)
123	History teachers (2222)
124	Political science teachers (2223)
125	Sociology teachers (2224)
126	Social science teachers, n.e.c. (2225)
127	Engineering teachers (2226)
128	Mathematical science teachers (2227)
129	Computer science teachers (2228)
133	Medical science teachers (2231)
134	Health specialties teachers (2232)
135	Business, commerce, and marketing teachers (2233)
136	Agriculture and forestry teachers (2234)
137	Art, drama, and music teachers (2235)
138	Physical education teachers (2236)
139	Education teachers (2237)
143	English teachers (2238)
144	Foreign language teachers (2242)
145	Law teachers (2243)
146	Social work teachers (2244)
147	Theology teachers (2245)
148	Trade and industrial teachers (2246)
149	Home economics teachers (2247)
153	Teachers, postsecondary, n.e.c. (2249)
154	Postsecondary teachers, subject not specified

Teachers, Except Postsecondary

155	Teachers, prekindergarten and kindergarten (231)
156	Teachers, elementary school (232)
157	Teachers, secondary school (233)
158	Teachers, special education (235)
159	Teachers, n.e.c. (236, 239)
163	Counselors, educational and vocational (24)

Librarians, Archivists, and Curators

164	Librarians (251)
165	Archivists and curators (252)

Social Scientists and Urban Planners

166	Economists (1912)
167	Psychologists (1915)
168	Sociologists (1916)
169	Social scientists, n.e.c. (1913, 1914, 1919)
173	Urban planners (192)

MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS—Con.

Professional Specialty Occupations—Con.

TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS

Technicians and Related Support Occupations

TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS—Con.

Technicians and Related Support Occupations—Con.

Sales Occupations

Sales Representatives, Finance and Business Services

Sales Representatives, Commodities Except Retail

Sales Workers, Retail and Personal Services

Sales Related Occupations

Administrative Support Occupations, Including Clerical

Supervisors, Administrative Support Occupations

Computer Equipment Operators

TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS—Con.

Administrative Support Occupations, including Clerical—Con.

Secretaries, Stenographers, and Typists
313   Secretaries (4622)
314   Stenographers (4623)
315   Typists (4624)

Information Clerks
316   Interviewers (4642)
317   Hotel clerks (4643)
318   Transportation ticket and reservation agents (4644)
319   Receptionists (4645)
323   Information clerks, n.e.c. (4649)

Records Processing Occupations, Except Financial
325   Classified-ad clerks (4662)
326   Correspondence clerks (4663)
327   Order clerks (4664)
328   Personnel clerks, except payroll and timekeeping (4692)
329   Library clerks (4694)
335   File clerks (4696)
336   Records clerks (4699)

Financial Records Processing Occupations
337   Bookkeepers, accounting, and auditing clerks (4712)
338   Payroll and timekeeping clerks (4713)
339   Billing clerks (4715)
343   Cost and rate clerks (4716)
344   Billing, posting, and calculating machine operators (4718)

Duplicating, Mail and Other Office Machine Operators
345   Duplicating machine operators (4722)
346   Mail preparing and paper handling machine operators (4723)
347   Office machine operators, n.e.c. (4729)

Communications Equipment Operators
348   Telephone operators (4732)
353   Communications equipment operators, n.e.c. (4733, 4739)

Mail and Message Distributing Occupations
354   Postal clerks, exc. mail carriers (4742)
355   Mail carriers, postal service (4743)
356   Mail clerks, exc. postal service (4744)
357   Messengers (4745)

Material Recording, Scheduling, and Distributing Clerks
359   Dispatchers (4751)
363   Production coordinators (4752)
364   Traffic, shipping, and receiving clerks (4753)
365   Stock and inventory clerks (4754)
366   Meter readers (4755)
368   Weighers, measurers, checkers and samplers (4756, 4757)
373   Expediters (4758)
374   Material recording, scheduling, and distributing clerks, n.e.c. (4759)

TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS—Con.

Administrative Support Occupations, Including Clerical—Con.

Adjusters and Investigators

375	Insurance adjusters, examiners, and investigators (4782)
376	Investigators and adjusters, except insurance (4783)
377	Eligibility clerks, social welfare (4784)
378	Bill and account collectors (4786)

Miscellaneous Administrative Support Occupations

379	General office clerks (463)
383	Bank tellers (4791)
384	Proofreaders (4792)
385	Data-entry keyers (4793)
386	Statistical clerks (4794)
387	Teachers' aides (4795)
389	Administrative support occupations, n.e.c. (4787, 4799)

SERVICE OCCUPATIONS

Private Household Occupations

403	Launderers and ironers (503)
404	Cooks, private household (504)
405	Housekeepers and butlers (505)
406	Child care workers, private household (506)
407	Private household cleaners and servants (502, 507, 509)

Protective Service Occupations

Supervisors, Protective Service Occupations

413	Supervisors, firefighting and fire prevention occupations (5111)
414	Supervisors, police and detectives (5112)
415	Supervisors, guards (5113)

Firefighting and Fire Prevention Occupations

416	Fire inspection and fire prevention occupations (5122)
417	Firefighting occupations (5123)

Police and Detectives

418	Police and detectives, public service (5132)
423	Sheriffs, bailiffs, and other law enforcement officers (5134)
424	Correctional institution officers (5133)

Guards

425	Crossing guards (5142)
426	Guards and police, exc. public service (5144)
427	Protective service occupations, n.e.c. (5149)

Service Occupations, Except Protective and Household

Food Preparation and Service Occupations

433	Supervisors, food preparation and service occupations (5211)
434	Bartenders (5212)
435	Waiters and waitresses (5213)
436	Cooks (5214, 5215)
438	Food counter, fountain and related occupations (5216)
439	Kitchen workers, food preparation (5217)

SERVICE OCCUPATIONS—Con.

Service Occupations, Except Protective and Household—Con.

443	Waiters'/waitresses' assistants (5218)
444	Miscellaneous food preparation occupations (5219)

Health Service Occupations
445	Dental assistants (5232)
446	Health aides, except nursing (5233)
447	Nursing aides, orderlies, and attendants (5236)

Cleaning and Building Service Occupations, except Household
448	Supervisors, cleaning and building service workers (5241)
449	Maids and housemen (5242, 5249)
453	Janitors and cleaners (5244)
454	Elevator operators (5245)
455	Pest control occupations (5246)

Personal Service Occupations
456	Supervisors, personal service occupations (5251)
457	Barbers (5252)
458	Hairdressers and cosmetologists (5253)
459	Attendants, amusement and recreation facilities (5254)
461	Guides (5255)
462	Ushers (5256)
463	Public transportation attendants (5257)
464	Baggage porters and bellhops (5262)
465	Welfare service aides (5263)
466	Family child care providers (pt 5264)
467	Early childhood teacher's assistants (pt 5264)
468	Child care workers, n.e.c. (pt 5264)
469	Personal service occupations, n.e.c. (5258, 5269)

FARMING, FORESTRY, AND FISHING OCCUPATIONS

Farm Operators and Managers
473	Farmers, except horticultural (5512-5514)
474	Horticultural specialty farmers (5515)
475	Managers, farms, except horticultural (5522-5524)
476	Managers, horticultural specialty farms (5525)

Other Agricultural and Related Occupations
Farm Occupations, Except Managerial
477	Supervisors, farm workers (5611)
479	Farm workers (5612-5617)
483	Marine life cultivation workers (5618)
484	Nursery workers (5619)

Related Agricultural Occupations
485	Supervisors, related agricultural occupations (5621)
486	Groundskeepers and gardeners, except farm (5622)
487	Animal caretakers, except farm (5624)
488	Graders and sorters, agricultural products (5625)
489	Inspectors, agricultural products (5627)

FARMING, FORESTRY, AND FISHING OCCUPATIONS—Con.

Forestry and Logging Occupations
494   Supervisors, forestry, and logging workers (571)
495   Forestry workers, except logging (572)
496   Timber cutting and logging occupations (573, 579)

Fishers, Hunters, and Trappers
497   Captains and other officers, fishing vessels (pt 8241)
498   Fishers (583)
499   Hunters and trappers (584)

PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS

Mechanics and Repairers
503   Supervisors, mechanics and repairers (60)

Mechanics and Repairers, Except Supervisors
Vehicle and Mobile Equipment Mechanics and Repairers
505   Automobile mechanics (pt 6111)
506   Automobile mechanic apprentices (pt 6111)
507   Bus, truck, and stationary engine mechanics (6112)
508   Aircraft engine mechanics (6113)
509   Small engine repairers (6114)
514   Automobile body and related repairers (6115)
515   Aircraft mechanics, exc. engine (6116)
516   Heavy equipment mechanics (6117)
517   Farm equipment mechanics (6118)
518   Industrial machinery repairers (613)
519   Machinery maintenance occupations (614)

Electrical and Electronic Equipment Repairers
523   Electronic repairers, communications and industrial equipment (6151, 6153, 6155)
525   Data processing equipment repairers (6154)
526   Household appliance and power tool repairers (6156)
527   Telephone line installers and repairers (6157)
529   Telephone installers and repairers (6158)
533   Miscellaneous electrical and electronic equipment repairers (6152, 6159)
534   Heating, air conditioning, and refrigeration mechanics (616)

Miscellaneous Mechanics and Repairers
535   Camera, watch, and musical instrument repairers (6171,6172)
536   Locksmiths and safe repairers (6173)
538   Office machine repairers (6174)
539   Mechanical controls and valve repairers (6175)
543   Elevator installers and repairers (6176)
544   Millwrights (6178)
547   Specified mechanics and repairers, n.e.c. (6177, 6179)
549   Not specified mechanics and repairers

Construction Trades
Supervisors, Construction Occupations
553   Supervisors; brickmasons, stonemasons, and tile setters (6312)
554   Supervisors, carpenters and related workers (6313)
555   Supervisors, electricians and power transmission installers (6314)
556   Supervisors; painters, paperhangers, and plasterers (6315)

PRECISION PRODUCTION, CRAFT, AND
REPAIR OCCUPATIONS—Con.

PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS—Con.

655	Miscellaneous precision metal workers (6829)

Precision Woodworking Occupations
656	Patternmakers and model makers, wood (6831)
657	Cabinet makers and bench carpenters (6832)
658	Furniture and wood finishers (6835)
659	Miscellaneous precision woodworkers (6839)

Precision Textile, Apparel, and Furnishings Machine Workers
666	Dressmakers (pt 6852, pt 7752)
667	Tailors (pt 6852)
668	Upholsterers (6853)
669	Shoe repairers (6854)
674	Miscellaneous precision apparel and fabric workers (6856, 6859, pt 7752)

Precision Workers, Assorted Materials
675	Hand molders and shapers, except jewelers (6861)
676	Patternmakers, lay-out workers, and cutters (6862)
677	Optical goods workers (6864, pt 7477, pt 7677)
678	Dental laboratory and medical appliance technicians (6865)
679	Bookbinders (6844)
683	Electrical and electronic equipment assemblers (6867)
684	Miscellaneous precision workers, n.e.c. (6869)

Precision Food Production Occupations
686	Butchers and meat cutters (6871)
687	Bakers (6872)
688	Food batchmakers (6873, 6879)

Precision Inspectors, Testers, and Related Workers
689	Inspectors, testers, and graders (6881, 828)
693	Adjusters and calibrators (6882)

Plant and System Operators
694	Water and sewage treatment plant operators (691)
695	Power plant operators (pt 693)
696	Stationary engineers (pt 693, 7668)
699	Miscellaneous plant and system operators (692, 694, 695, 696)

OPERATORS, FABRICATORS, AND LABORERS

Machine Operators, Assemblers, and Inspectors

Machine Operators and Tenders, Except Precision
Metalworking and Plastic Working Machine Operators
703	Lathe and turning machine set-up operators (7312)
704	Lathe and turning machine operators (7512)
705	Milling and planing machine operators (7313, 7513)
706	Punching and stamping press machine operators (7314, 7317, 7514, 7517)
707	Rolling machine operators (7316, 7516)
708	Drilling and boring machine operators (7318, 7518)
709	Grinding, abrading, buffing, and polishing machine operators (7322, 7324, 7522)
713	Forging machine operators (7319, 7519)

OPERATORS, FABRICATORS, AND LABORERS—Con.

Machine Operators, Assemblers, and Inspectors—Con.

714   Numerical control machine operators (7326)
715   Miscellaneous metal, plastic, stone, and glass working machine operators (7329, 7529)
717   Fabricating machine operators, n.e.c. (7339, 7539)

Metal and Plastic Processing Machine Operators

719   Molding and casting machine operators (7315, 7342, 7515,7542)
723   Metal plating machine operators (7343, 7543)
724   Heat treating equipment operators (7344, 7544)
725   Miscellaneous metal and plastic processing machine operators (7349, 7549)

Woodworking Machine Operators

726   Wood lathe, routing, and planing machine operators (7431,7432, 7631, 7632)
727   Sawing machine operators (7433, 7633)
728   Shaping and joining machine operators (7435, 7635)
729   Nailing and tacking machine operators (7636)
733   Miscellaneous woodworking machine operators (7434, 7439, 7634, 7639)

Printing Machine Operators

734   Printing press operators (7443, 7643)
735   Photoengravers and lithographers (6842, 7444, 7644)
736   Typesetters and compositors (6841, 7642)
737   Miscellaneous printing machine operators (6849, 7449, 7649)

Textile, Apparel, and Furnishings Machine Operators

738   Winding and twisting machine operators (7451, 7651)
739   Knitting, looping, taping, and weaving machine operators (7452, 7652)
743   Textile cutting machine operators (7654)
744   Textile sewing machine operators (7655)
745   Shoe machine operators (7656)
747   Pressing machine operators (7657)
748   Laundering and dry cleaning machine operators (6855, 7658)
749   Miscellaneous textile machine operators (7459, 7659)

Machine Operators, Assorted Materials

753   Cementing and gluing machine operators (7661)
754   Packaging and filling machine operators (7462, 7662)
755   Extruding and forming machine operators 7463, 7663)
756   Mixing and blending machine operators (7664)
757   Separating, filtering, and clarifying machine operators (7476, 7666, 7676)
758   Compressing and compacting machine operators (7467, 7667)
759   Painting and paint spraying machine operators (7669)
763   Roasting and baking machine operators, food (7472, 7672)
764   Washing, cleaning, and pickling machine operators (7673)
765   Folding machine operators (7474, 7674)
766   Furnace, kiln, and oven operators, exc. food (7675)
768   Crushing and grinding machine operators (pt 7477, pt 7677)
769   Slicing and cutting machine operators (7478, 7678)
773   Motion picture projectionists (pt 7479)
774   Photographic process machine operators (6863, 6868, 7671)
777   Miscellaneous machine operators, n.e.c. (pt 7479, 7665, 7679)
779   Machine operators, not specified

OPERATORS, FABRICATORS, AND LABORERS—Con.

Machine Operators, Assemblers, and Inspectors—Con.

Fabricators, Assemblers, and Hand Working Occupations
783   Welders and cutters (7332, 7532, 7714)
784   Solderers and brazers (7333, 7533, 7717)
785   Assemblers (772, 774)
786   Hand cutting and trimming occupations (7753)
787   Hand molding, casting, and forming occupations (7754, 7755)
789   Hand painting, coating, and decorating occupations (7756)
793   Hand engraving and printing occupations (7757)
795   Miscellaneous hand working occupations (7758, 7759)

Production Inspectors, Testers, Samplers, and Weighers
796   Production inspectors, checkers, and examiners (782, 787)
797   Production testers (783)
798   Production samplers and weighers (784)
799   Graders and sorters, exc. agricultural (785)

Transportation and Material Moving Occupations

Motor Vehicle Operators
803   Supervisors, motor vehicle operators (8111)
804   Truck drivers (8212-8214)
806   Driver-sales workers (8218)
808   Bus drivers (8215)
809   Taxicab drivers and chauffeurs (8216)
813   Parking lot attendants (874)
814   Motor transportation occupations, n.e.c. (8219)

Transportation Occupations, Except Motor Vehicles
Rail Transportation Occupations
823   Railroad conductors and yardmasters (8113)
824   Locomotive operating occupations (8232)
825   Railroad brake, signal, and switch operators (8233)
826   Rail vehicle operators, n.e.c. (8239)

Water Transportation Occupations
828   Ship captains and mates, except fishing boats (pt 8241, 8242)
829   Sailors and deckhands (8243)
833   Marine engineers (8244)
834   Bridge, lock, and lighthouse tenders (8245)

Material Moving Equipment Operators
843   Supervisors, material moving equipment operators (812)
844   Operating engineers (8312)
845   Longshore equipment operators (8313)
848   Hoist and winch operators (8314)
849   Crane and tower operators (8315)
853   Excavating and loading machine operators (8316)
855   Grader, dozer, and scraper operators (8317)
856   Industrial truck and tractor equipment operators (8318)
859   Miscellaneous material moving equipment operators (8319)

OPERATORS, FABRICATORS, AND LABORERS—Con.

Handlers, Equipment Cleaners, Helpers, and Laborers

864	Supervisors, handlers, equipment cleaners, and laborers, n.e.c. (85)
865	Helpers, mechanics and repairers (863)

Helpers, Construction and Extractive Occupations

866	Helpers, construction trades (8641-8645, 8648)
867	Helpers, surveyor (8646)
868	Helpers, extractive occupations (865)
869	Construction laborers (871)
874	Production helpers (861, 862)

Freight, Stock, and Material Handlers

875	Garbage collectors (8722)
876	Stevedores (8723)
877	Stock handlers and baggers (8724)
878	Machine feeders and offbearers (8725)
883	Freight, stock, and material handlers, n.e.c. (8726)
885	Garage and service station related occupations (873)
887	Vehicle washers and equipment cleaners (875)
888	Hand packers and packagers (8761)
889	Laborers, except construction (8769)

MILITARY OCCUPATIONS

903	Commissioned Officers and Warrant Officers
904	Non-commissioned Officers and Other Enlisted Personnel
905	Military occupation, rank not specified

EXPERIENCED UNEMPLOYED NOT CLASSIFIED BY OCCUPATION

909	Last worked 1984 or earlier

APPENDIX A-5

1990 Census of Population Industry Classification System

The list presents the industrial classification developed for the 1990 Census of Population and Housing. There are 235 categories for the employed, with 1 additional category for the experienced unemployed, and 7 additional categories for the Armed Forces. These categories are aggregated into 13 major groups. The classification is developed from the 1987 Standard Industrial Classification. "n.e.c." is the abbreviation for not elsewhere classified.

1990 Census code	Industry category
	AGRICULTURE, FORESTRY, AND FISHERIES
010	Agricultural production, crops (01)
011	Agricultural production, livestock (02)
012	Veterinary services (074)
020	Landscape and horticultural services (078)
030	Agricultural services, n.e.c. (071, 072, 075, 076)
031	Forestry (08)
032	Fishing, hunting, and trapping (09)
	MINING
040	Metal mining (10)
041	Coal mining (12)
042	Oil and gas extraction (13)
050	Nonmetallic mining and quarrying, except fuels (14)
060	**CONSTRUCTION (15, 16, 17)**
	MANUFACTURING
	Nondurable Goods
	Food and kindred products
100	Meat products (201)
101	Dairy products (202)
102	Canned, frozen, and preserved fruits and vegetables (203)
110	Grain mill products (204)
111	Bakery products (205)
112	Sugar and confectionery products (206)
120	Beverage industries (208)
121	Miscellaneous food preparations and kindred products (207,209)
122	Not specified food industries
130	Tobacco manufactures (21)
	Textile mill products
132	Knitting mills (225)
140	Dyeing and finishing textiles, except wool and knit goods (226)
141	Carpets and rugs (227)
142	Yarn, thread, and fabric mills (221-224, 228)
150	Miscellaneous textile mill products (229)

MANUFACTURING—Con.

Nondurable Goods—Con.

Apparel and other finished textile products
151   Apparel and accessories, except knit (231-238)
152   Miscellaneous fabricated textile products (239)

Paper and allied products
160   Pulp, paper, and paperboard mills (261-263)
161   Miscellaneous paper and pulp products (267)
162   Paperboard containers and boxes (265)

Printing, publishing, and allied industries
171   Newspaper publishing and printing (271)
172   Printing, publishing, and allied industries, except newspapers (272-279)

Chemicals and allied products
180   Plastics, synthetics, and resins (282)
181   Drugs (283)
182   Soaps and cosmetics (284)
190   Paints, varnishes, and related products (285)
191   Agricultural chemicals (287)
192   Industrial and miscellaneous chemicals (281, 286, 289)

Petroleum and coal products
200   Petroleum refining (291)
201   Miscellaneous petroleum and coal products (295, 299)

Rubber and miscellaneous plastics products
210   Tires and inner tubes (301)
211   Other rubber products, and plastics footwear and belting (302-306)
212   Miscellaneous plastics products (308)

Leather and leather products
220   Leather tanning and finishing (311)
221   Footwear, except rubber and plastic (313, 314)
222   Leather products, except footwear (315-317, 319)

Durable Goods

Lumber and wood products, except furniture
230   Logging (241)
231   Sawmills, planing mills, and millwork (242, 243)
232   Wood buildings and mobile homes (245)
241   Miscellaneous wood products (244, 249)
242 Furniture and fixtures (25)

Stone, clay, glass, and concrete products
250   Glass and glass products (321-323)
251   Cement, concrete, gypsum, and plaster products (324,327)
252   Structural clay products (325)
261   Pottery and related products (326)
262   Miscellaneous nonmetallic mineral and stone products (328, 329)

MANUFACTURING—Con.

Durable Goods—Con.

Metal Industries
270	Blast furnaces, steelworks, rolling and finishing mills (331)
271	Iron and steel foundries (332)
272	Primary aluminum industries (3334, part 334, 3353-3355,3363,3365)
280	Other primary metal industries (3331, 3339, part 334, 3351,3356, 3357, 3364, 3366, 3369, 339)
281	Cutlery, handtools, and general hardware (342)
282	Fabricated structural metal products (344)
290	Screw machine products (345)
291	Metal forgings and stampings (346)
292	Ordnance (348)
300	Miscellaneous fabricated metal products (341, 343, 347, 349)
301	Not specified metal industries

Machinery and computing equipment
310	Engines and turbines (351)
311	Farm machinery and equipment (352)
312	Construction and material handling machines (353)
320	Metalworking machinery (354)
321	Office and accounting machines (3578, 3579)
322	Computers and related equipment (3571-3577)
331	Machinery, except electrical, n.e.c. (355, 356, 358, 359)
332	Not specified machinery

Electrical machinery, equipment, and supplies
340	Household appliances (363)
341	Radio, TV, and communication equipment (365, 366)
342	Electrical machinery, equipment, and supplies, n.e.c. (361,362, 364, 367, 369)
350	Not specified electrical machinery, equipment, and supplies

Transportation equipment
351	Motor vehicles and motor vehicle equipment (371)
352	Aircraft and parts (372)
360	Ship and boat building and repairing (373)
361	Railroad locomotives and equipment (374)
362	Guided missiles, space vehicles, and parts (376)
370	Cycles and miscellaneous transportation equipment (375, 379)

Professional and photographic equipment, and watches
371	Scientific and controlling instruments (381, 382 exc. 3827)
372	Medical, dental, and optical instruments and supplies (3827,384, 385)
380	Photographic equipment and supplies (386)
381	Watches, clocks, and clockwork operated devices (387)
390	Toys, amusement, and sporting goods (394)
391	Miscellaneous manufacturing industries (39 exc. 394)
392	Not specified manufacturing industries

TRANSPORTATION, COMMUNICATIONS, AND OTHER PUBLIC UTILITIES

Transportation
400	Railroads (40)
401	Bus service and urban transit (41, except 412)
402	Taxicab service (412)
410	Trucking service (421, 423)
411	Warehousing and storage (422)
412	U.S. Postal Service (43)

TRANSPORTATION, COMMUNICATIONS, AND OTHER PUBLIC UTILITIES—Con.

420	Water transportation (44)
421	Air transportation (45)
422	Pipe lines, except natural gas (46)
432	Services incidental to transportation (47)

Communications

440	Radio and television broadcasting and cable (483, 484)
441	Telephone communications (481)
442	Telegraph and miscellaneous communications services (482, 489)

Utilities and sanitary services

450	Electric light and power (491)
451	Gas and steam supply systems (492, 496)
452	Electric and gas, and other combinations (493)
470	Water supply and irrigation (494, 497)
471	Sanitary services (495)
472	Not specified utilities

WHOLESALE TRADE

Durable Goods

500	Motor vehicles and equipment (501)
501	Furniture and home furnishings (502)
502	Lumber and construction materials (503)
510	Professional and commercial equipment and supplies (504)
511	Metals and minerals, except petroleum (505)
512	Electrical goods (506)
521	Hardware, plumbing and heating supplies (507)
530	Machinery, equipment, and supplies (508)
531	Scrap and waste materials (5093)
532	Miscellaneous wholesale, durable goods (509 exc. 5093)

Nondurable Goods

540	Paper and paper products (511)
541	Drugs, chemicals and allied products (512, 516)
542	Apparel, fabrics, and notions (513)
550	Groceries and related products (514)
551	Farm-product raw materials (515)
552	Petroleum products (517)
560	Alcoholic beverages (518)
561	Farm supplies (5191)
562	Miscellaneous wholesale, nondurable goods (5192-5199)
571	Not specified wholesale trade

RETAIL TRADE

580	Lumber and building material retailing (521, 523)
581	Hardware stores (525)
582	Retail nurseries and garden stores (526)
590	Mobile home dealers (527)
591	Department stores (531)
592	Variety stores (533)
600	Miscellaneous general merchandise stores (539)
601	Grocery stores (541)

RETAIL TRADE—Con.

602	Dairy products stores (545)
610	Retail bakeries (546)
611	Food stores, n.e.c. (542, 543, 544, 549)
612	Motor vehicle dealers (551, 552)
620	Auto and home supply stores (553)
621	Gasoline service stations (554)
622	Miscellaneous vehicle dealers (555, 556, 557, 559)
623	Apparel and accessory stores, except shoe (56, except 566)
630	Shoe stores (566)
631	Furniture and home furnishings stores (571)
632	Household appliance stores (572)
633	Radio, TV, and computer stores (5731, 5734)
640	Music stores (5735, 5736)
641	Eating and drinking places (58)
642	Drug stores (591)
650	Liquor stores (592)
651	Sporting goods, bicycles, and hobby stores (5941, 5945, 5946)
652	Book and stationery stores (5942, 5943)
660	Jewelry stores (5944)
661	Gift, novelty, and souvenir shops (5947)
662	Sewing, needlework and piece goods stores (5949)
663	Catalog and mail order houses (5961)
670	Vending machine operators (5962)
671	Direct selling establishments (5963)
672	Fuel dealers (598)
681	Retail florists (5992)
682	Miscellaneous retail stores (593, 5948, 5993-5995, 5999)
691	Not specified retail trade

FINANCE, INSURANCE, AND REAL ESTATE

700	Banking (60 exc. 603 and 606)
701	Savings institutions, including credit unions (603, 606)
702	Credit agencies, n.e.c. (61)
710	Security, commodity brokerage, and investment companies (62, 67)
711	Insurance (63, 64)
712	Real estate, including real estate-insurance offices (65)

BUSINESS AND REPAIR SERVICES

721	Advertising (731)
722	Services to dwellings and other buildings (734)
731	Personnel supply services (736)
732	Computer and data processing services (737)
740	Detective and protective services (7381, 7382)
741	Business services, n.e.c. (732, 733, 735, 7383-7389)
742	Automotive rental and leasing, without drivers (751)
750	Automobile parking and carwashes (752, 7542)
751	Automotive repair and related services (753, 7549)
752	Electrical repair shops (762, 7694)
760	Miscellaneous repair services (763, 764, 7692, 7699)

PERSONAL SERVICES

761	Private households (88)
762	Hotels and motels (701)
770	Lodging places, except hotels and motels (702, 703, 704)
771	Laundry, cleaning, and garment services (721 exc. part 7219)
772	Beauty shops (723)
780	Barber shops (724)
781	Funeral service and crematories (726)
782	Shoe repair shops (725)
790	Dressmaking shops (part 7219)
791	Miscellaneous personal services (722, 729)

ENTERTAINMENT AND RECREATION SERVICES

800	Theaters and motion pictures (781-783, 792)
801	Video tape rental (784)
802	Bowling centers (793)
810	Miscellaneous entertainment and recreation services (791, 794, 799)

PROFESSIONAL AND RELATED SERVICES

812	Offices and clinics of physicians (801, 803)
820	Offices and clinics of dentists (802)
821	Offices and clinics of chiropractors (8041)
822	Offices and clinics of optometrists (8042)
830	Offices and clinics of health practitioners, n.e.c. (8043, 8049)
831	Hospitals (806)
832	Nursing and personal care facilities (805)
840	Health services, n.e.c. (807, 808, 809)
841	Legal services (81)
842	Elementary and secondary schools (821)
850	Colleges and universities (822)
851	Vocational schools (824)
852	Libraries (823)
860	Educational services, n.e.c. (829)
861	Job training and vocational rehabilitation services (833)
862	Child day care services (part 835)
863	Family child care homes (part 835)
870	Residential care facilities, without nursing (836)
871	Social services, n.e.c. (832, 839)
872	Museums, art galleries, and zoos (84)
873	Labor unions (863)
880	Religious organizations (866)
881	Membership organizations, n.e.c. (861, 862, 864, 865, 869)
882	Engineering, architectural, and surveying services (871)
890	Accounting, auditing, and bookkeeping services (872)
891	Research, development, and testing services (873)
892	Management and public relations services (874)
893	Miscellaneous professional and related services (899)

PUBLIC ADMINISTRATION

900	Executive and legislative offices (911-913)
901	General government, n.e.c. (919)
910	Justice, public order, and safety (92)
921	Public finance, taxation, and monetary policy (93)
922	Administration of human resources programs (94)

PUBLIC ADMINISTRATION—Con.

930   Administration of environmental quality and housing programs (95)
931   Administration of economic programs (96)
932   National security and international affairs (97)

ACTIVE DUTY MILITARY

Armed Forces
940   Army
941   Air Force
942   Navy
950   Marines
951   Coast Guard
952   Armed Forces, Branch not specified
960   Military Reserves or National Guard

EXPERIENCED UNEMPLOYED NOT CLASSIFIED BY INDUSTRY

992   Last worked 1984 or earlier

| 8 ADDRESS (Street _____ Line _____) | 8c Special place name | | | OFFICE USE ONLY | | | | | | INTRODUCTION |
| 8a What is your exact address? | | | | | | | | | | |

8d Type code

8e Sample number

AREA SEGMENTS ONLY

House number, street, Apt. number, or other identification

Place | County | State | ZIP Code

8b Is this also your mailing address? ☐ Yes ☐ No – Specify below

Route number, P.O. Box, or other identification

Place | County | State | ZIP Code

9 YEAR BUILT
- ☐ Ask last visit
- ☐ DO NOT ASK

When was this structure originally built?
- ☐ Before 4-1-80 – Continue interview
- ☐ After 4-1-80 – Complete item 10c when vacant. (NO INTERVIEW)

10 COVERAGE QUESTIONS
- ☐ Ask done marked
- ☐ DO NOT ASK

10a Are there any occupied or vacant living quarters besides your own in this building? ☐ Yes – Fill Table X ☐ No

10b Are there any occupied or vacant living quarters besides your own on this floor? ☐ Yes – Fill Table X ☐ No

10c Is there any other building on this property for people to live in – either occupied or vacant? ☐ Yes – Fill Table X ☐ No

11 GEOGRAPHIC LOCATION – FILL ON MOVER'S NEW CONTROL CARD

11a Is listed address within the limits of a city, town, or village?
1 ☐ Yes – What is the name?
2 ☐ No – Not within the limits of a city, town, or village

11b Address is: 1 ☐ Within a SPP PSU
2 ☐ 0 – 24
3 ☐ 25 – 49
4 ☐ 50 – 74
5 ☐ 75 – 100
6 ☐ 100+

12 LAND USE

12a Follow instructions for box that is marked
1 ☐ URBAN – SKIP to item 13
2 ☐ RURAL – Reg units and SP. PL. units coded 05-99 in B4 – ASK item 12b
3 ☐ Undescribed – ASK item 12b or mark by observation

12b During the past 12 months did sales of crops, livestock, and other farm products from this place amount to $1,000 or more?
1 ☐ Yes
2 ☐ No

13 CLASSIFICATION OF LIVING QUARTERS – Mark by observation

13a FIELD REPRESENTATIVE CHECK ITEM
Unit is –
1 ☐ In a Special Place – Refer to Table A in Part C of manual and mark appropriate box in either 13c or 13d
2 ☐ NOT in a Special Place

13b ACCESS
1 ☐ Direct – Go to item 13c
2 ☐ Through another unit – Not a separate HU, combine with unit through which access is gained. Apply merged unit procedures if appropriate

13c HOUSING UNIT
1 ☐ House, apartment, flat
2 ☐ HU, in nontransient hotel, motel, etc.
3 ☐ HU, permanent in transient hotel, motel, etc.
4 ☐ HU, in rooming house
5 ☐ Mobile home or trailer with NO permanent room added
6 ☐ Mobile home or trailer with one or more permanent rooms added
7 ☐ HU not specified above – Describe in notes

13d OTHER units
8 ☐ Quarters not HU in rooming or boarding house
9 ☐ Unit not permanent in transient hotel, motel, etc.
10 ☐ Unoccupied site for mobile home, trailer, or tent
11 ☐ OTHER unit not specified above – Describe in notes

14 UNITS IN STRUCTURE

ASK IF NOT APPARENT –
How many housing units (both occupied and vacant) are there in this structure?
1 ☐ Only OTHER units
2 ☐ Mobile home or trailer
3 ☐ One, detached
4 ☐ One, attached
5 ☐ Two
6 ☐ 3 – 4
7 ☐ 5 – 9
8 ☐ 10 – 19
9 ☐ 20 – 49
10 ☐ 50 or more

15 TENURE

Are your living quarters –
1 ☐ Owned or being bought by you or someone in your household?
2 ☐ Rented for cash?
3 ☐ Occupied without payment of cash rent?

16 CHARACTERISTICS OF UNIT – UPDATE/VERIFY EACH WAVE

ASK ONLY IF UNIT IS RENTED (Otherwise go to item 16c on page 2, or 21b if first interview at mover's new address)

16a Is this residence in a public housing project, that is, is it owned by a local housing authority?
1 ☐ Yes – Go to item 16c, page 2 OR 21b if first interview at mover's new address
2 ☐ No
3 ☐ DK

16b Is the Federal, State or local government paying part of the rent for this residence?
1 ☐ Yes Go to item 16c, page 2 OR 21b if first interview at mover's new address
2 ☐ No
3 ☐ DK

NOTES

16 HOUSEHOLD FINAL INTERVIEW STATUS – Complete after interview

19b What is the best time to call or visit? ___ a.m. ___ p.m.

19c Please give me the name, address, and telephone number of a close relative or friend who would know how to reach you if we are unable to contact you.

Name _____

Relationship to person no. ____

Address (No., St., Apt. No., City, State, ZIP code) _____

Telephone – (Incl. area code) _____

CODES FOR HOUSEHOLD INTERVIEW STATUS

Wave 1 Interview Status

01 – Interviewed

Type A – Noninterview
02 – No one home
03 – Temporarily absent
05 – Refused
06 – Unable to locate
08 – Other Specify

Type B – Noninterview
00 – Vacant
10 – Occupied by persons with URE
11 – Units or so to be demolished
12 – Converted to temporary business or storage
13 – Unoccupied site for mobile home, trailer, or tent
14 – Permit granted, construction not started
16 – Other Specify

Type C – Noninterview
17 – Demolished
18 – House or trailer moved
19 – Converted to permanent business or storage
20 – Merged
21 – Condemned
22 – Other Specify

Waves 2 – 8 Interview status

01 – Interviewed

Type A – Noninterview
02 – No one home
03 – Temporarily absent
04 – Refused
05 – Unable to locate
06 – Other Specify

Type B – Noninterview
18 – URE
or temporarily ineligible

Type C – Noninterview
17 – Demolished
23 – Deleted (sample adjustment, error)
24 – Entire household deceased, moved out of country, or living in armed forces barracks

Type D – Noninterview
25 – Moved, address unknown
26 – Moved within country beyond limit

20 – All sample persons entered on new Control Card (On old cc enter '20' on item 30)

J4a MOVERS

Person number(s)	Entire HH moved ☐ – If box is marked fill 34b	New telephone number	

1
- New address – Number and street
- City / State / ZIP Code
- Other Identification / Wave move discovered

2
- Person number(s) / New telephone number
- New address – Number and street
- City / State / ZIP Code
- Other Identification / Wave move discovered

3
- Person number(s) / New telephone number
- New address – Number and street
- City / State / ZIP Code
- Other Identification / Wave move discovered

4
- Person number(s) / New telephone number
- New address – Number and street
- City / State / ZIP Code
- Other Identification / Wave move discovered

5
- Person number(s) / New telephone number
- New address – Number and street
- City / State / ZIP Code
- Other Identification / Wave move discovered

INTRODUCTION

FIELD REPRESENTATIVE INSTRUCTIONS — Read introduction once to each respondent. Do not repeat to another respondent who was in the room when you earlier read the introduction.

This survey is about the economic situation of people living in the United States. Most of the questions will be about ...'s activities during _____. _____, _____, and _____. Here is a calendar that shows the 4 months we will be talking about. (Hand respondent Flashcard J) This time period is very important, so if you have any questions about what period is being referred to during the interview, please ask me.

We need the most accurate and complete information possible. Please think carefully about each question, search your memory and take your time in answering. For some of the questions it will help to look up the answers by checking whatever records are available to you here.

CHECK ITEM E4   Is "DK" marked in all parts of item 8a?   2040 | 1 ☐ Yes
2 ☐ No — *SKIP to 9a*

8b. If I were to call back later would you (or . . .) be able to provide me with the amounts of pay . . . received in each of these months? *(Information about how much . . . received each month is very important to the results of this survey.)*

2042 | 1 ☐ Yes — *Mark Reminder Card and Callback Summary, Item 3a*
2 ☐ No

9a. On this job, was . . . a member of a labor union or a member of an employee association similar to a union during the 4-month period?

2044 | 1 ☐ Yes — *SKIP to Check Item E5*
☐ No

b. Was . . . covered by a union or employee association contract during the 4-month period?

2046 | 1 ☐ Yes
2 ☐ No

CHECK ITEM E5   Number of employers in item 1b, page 13?

2048 | 1 ☐ 1 employer — *SKIP to Check Item E8, page 17*
2 ☐ 2 or more employers

Part A2 — EMPLOYER IDENTIFICATION NUMBER 2

10a. What is the name of the employer for whom ... worked during this 4-month period?
(If ... worked for 3 or more employers, enter in A1 and A2 the 2 employers for whom ... worked the most hours.)

`2100` Employer name

CHECK ITEM E6 — Enter number "2" for this employer in box. ——————→

`3102` Employer I.D. No.

10b. What kind of business or industry was *(Name of company or business)?*
For example: TV and radio manufacturing, retail shoe store, State Labor Department, farm.

`2104`

ASK OR VERIFY —

c. Is it mainly —

`2105`
1 ☐ Manufacturing?
2 ☐ Wholesale Trade?
3 ☐ Retail Trade?
4 ☐ Some other kind of business?

---

d. What kind of work was ... doing on this job?
For example: Electrical engineer, stock clerk, typist, farmer.

`2106`

---

e. What were ...'s main activities or duties on this job?
For example: Types, keeps account books, files, sells cars, operates printing press, finishes concrete.

`2110`

ASK OR VERIFY —

f. Was ... an employee of —

`2112`
1 ☐ A private for-profit company or individual?
2 ☐ A private not-for-profit, tax exempt, or charitable organization?
3 ☐ Federal government (exclude Armed Forces)?
4 ☐ State government?
5 ☐ Local government?
6 ☐ Armed Forces?
7 ☐ Unpaid in family business or farm?

ASK OR VERIFY —

11a. Was ... employed by *(Name of employer)* during the entire 4-month period?

`2114`
1 ☐ Yes — SKIP to 12
2 ☐ No

---

b. When was ... employed by *(Name of employer)* during this 4-month period?

`2116` FROM ____ Month `2118` ____ Day
`2120` TO ____ Month `2122` ____ Day

CHECK ITEM E3.1 — Did ... stop working for this employer during the reference period?

`2123`
1 ☐ Yes
2 ☐ No — SKIP to 12

11c. What is the main reason ... stopped working for *(Name of employer)?*
Mark (X) only one

`2124`
1 ☐ Laid off
2 ☐ Retired
3 ☐ Discharged
5 ☐ Job was temporary and ended
6 ☐ Quit to take another job
7 ☐ Quit for some other reason

ASK OR VERIFY —

12. How many hours per week did ... usually work at this job?

`2125`
____ Hours
x3 ☐ None
x1 ☐ DK

---

13. Was ... paid by the hour on this job?

`2126`
1 ☐ Yes
2 ☐ No — SKIP to 15a

---

14. What was ...'s regular hourly pay rate at the end of *(Read last month or "to" date in item 3b)?*

`2128`
$ ____ . ____
x1 ☐ DK
x2 ☐ Ref. — SKIP to Check Item E8

15a. During the 4-month period how often was ... paid on this job?

`2129`
1 ☐ Once a week
2 ☐ Once each 2 weeks
3 ☐ Once a month
4 ☐ Twice a month
5 ☐ Unpaid in family business or farm — SKIP to Check Item E8
6 ☐ Some other way — Specify

_____

---

b. On what date was ... last paid during this 4-month period?

`2130` ____ Month   `2130` ____ Day
x1 ☐ DK   x1 ☐ DK
x2 ☐ Ref.   x2 ☐ Ref.
x4 ☐ Not paid during this   x4 ☐ Not paid during this
    reference period   reference period

Part A2 — EMPLOYER IDENTIFICATION NUMBER 2(Continued)

16a. *READ STATEMENT ONLY ONCE PER RESPONDENT*

The next question is about the pay . . . received from this job during the 4-month period. We need the most accurate figures you can provide. Please remember that certain months contain 5 paydays for workers paid weekly and 3 paydays for workers paid every 2 weeks. Be sure to include any tips, bonuses, overtime pay, or commissions.

What was the total amount of pay that . . . received BEFORE deductions on this job in *(Read each month)?*

'FOR MEMBERS OF THE ARMED FORCES — *(Be sure to include cash housing allowances and any other special types of pay.)*

APPENDIX C

SIPP WHAT'S AVAILABLE
Ordering Information

Various working papers, Statistical Briefs and other products are available free of charge. To receive a list of these products, send your request to:

> Data User Services Division
> Microdata Access Branch
> Bureau of the Census
> Washington, DC 20233

You may also request products by phone. Please contact Carmen Campbell on (301) 457-1139.

APPENDIX D

Machine-Readable Data Dictionary Layout

Data dictionary lines are 46 characters. The character on the first position determines the type of lines. Each variable may have the following lines:

1. COMMENTS (" * ") lines
2. DATA DICTIONARY (" D ") ; line and DATA DESCRIPTION
3. UNIVERSE (" U ") lines
4. VALUE DESCRIPTION lines
5. One blank line at the end

FORMAT

"*" LINE   COMMENTS

a.   " * " in the first position indicates that this is a comment line. This line can appear any place in the dictionary. It will be used for short comments or to nullify any value codes.

b.   " ** " in the first two positions is also comments but it has additional meaning. It indicates this is a block of comments which will be applied to several variables. The first line of this block will ave the COMMENT NO. so that subsequent variable can refer back to this comment block.

"D" LINE   DATA DICTIONARY

This line contains the following information:

ID	"D"	COL	1- 1
NAME	Variable name	COL	3-10
SIZE	Size of data field	COL	14-15
BEGIN	Begin position of data field	COL	19-22
INDEX	Number of repetitions of each variable	COL	26-27
LENGTH	Length of data field	COL	30-31

Text describing the variable will follow this "D" line. Use COL 6-46 and repeat as many lines as necessary.

"U" LINE   UNIVERSE DEFINITION

This line contains the universe definition. Use COL 3-46 and repeat as many lines as necessary.

ID	" U "	COL	1- 1
DESCRIPTION	Universe description	COL	3-46

(For continuation use COL 3-46 and repeat as many lines as necessary.)

"V" LINE   VALUE DEFINITION

ID	" V "	COL	1- 1
VALUE	Value code-right justified	COL	3-12
	". "	COL	14
DESCRIPTION	Value description	COL	15-46

(Repeat COL 14-46 format for continued value description.)

APPENDIX E

User Notes

This section is reserved for any information relevant to the SIPP 1991 Full Panel Microdata on tape and CD-ROM File that indicates specific problems with the data, or that becomes available after the file is released. Any such information should be filed behind this page.

User Notes will be sent to all users who (1) purchased their file (or technical documentation) from the Census Bureau and (2) returned the coupon following the title page.
